The Director,
Samuel Omogo Foundation,
Wyoming Michigan USA
• Father,

REQUEST FOR WATER BOREHOLE

We on behalf the Government Girls Technical College Agba wish to thank you sincerely for the wonderful work you have been doing in Ebonyi state for providing water borehole to schools, churches and communities. We wish to request that such magnanimity by your foundation may be extended to us to help reduce the level of water scarcity we experience annually during dry season.

Government Girls Technical College Agba is densely populated by about seven hundred (700) female students and about hundred (100) members of the staff. All the students are boarders and all the members of the staff are resident in the school but unfortunately, the school has only one motorized borehole to serve this teeming population.

The epileptic power supply and high cost of fuel make it more difficult to pump water regularly. Besides, the borehole is not well sited. The water level aquafet does not sustain water for a long time during dry season. This has made water supply to both students and teachers a difficult task. The students sometimes go to classes without taking bath because of water scarcity. The situation has also affected the activities of the school because of the time spent on long queue to fetch water. The sanitation of the school environment is also affected because the students lack water to flush their toilets and wash their bathrooms.

Hence, we sincerely request your foundation to come to our aid by providing manual water borehole for the college. This will not need electricity to supply water and invariably complement the existing motorized borehole.

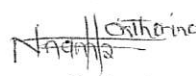

Finally, we thank you once again for your contributions to humanity especially provision of boreholes to many schools, churches and communities in Ebonyi state. We would be grateful to God and to you if we are one of the beneficiaries of your kind gesture.

KNIGHTS OF ST. JOHN INTERNATIONAL COLLEGE

AKWURAKWU, AGBA, ISHIELD L.G.A., EBONYI STATE.

20/01/22

The Director,
Samuel Omogo Foundation,
Wyoming Michigan USA.
Father,

REQUEST FOR WATER BOREHOLE

We sincerely wish to thank you on behalf of the Knight of St. John International Boys Technical College Agba, for the special ways God has used you to bless the people of Ebonyi State. Your contribution to the betterment of humanity especially in providing water borehole is a gift. We however, request that the philanthropic generosity by your foundation may be extended to us, to assist us in curbing the water scarcity we experience in our school.

We would want you to know that our school, Knight of St. John International Boys College is mission school sited in the hinterland of Agba. The school has constantly faced water scarcity due to lack of workable borehole. This has in so many ways affected teaching and learning in the school. The students who are all boarders most times are faced by this challenge to depend solely on the water well built in the school which dries up entirely during dry season, and most times go to classes without taking their bath and washing their clothes. The sanitation of the entire school is also affected by this water scarcity as toilets and bathrooms of students are left un-flushed and washed respectively to the mercy of any moment water is seen. Hence, we request honestly that your foundation come to our aid by providing manual water borehole for the school. This will go a long way in helping to reduce the scarcity of water we experience in our school and thus checkmate all these challenges we face due to lack of water in our school.

We finally thank you once again for your unalloyed contributions to humanity especially in providing water boreholes to schools, churches and communities in Ebonyi State and pray God's grace may be showered on you. We will be ever thankful to God and to you and your foundation if we benefit in this your kind gesture.

Ohaukwu L.G.A

Dear Fr.

APPLICATION FOR BOREHOLE DRILLING

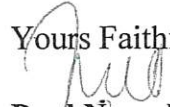

We the entire Catholic Community of Blessed Virgin Mary's Parish Onunwafor Umuhuali humbly wish to apply for Borehole drilling in our Parish.

Since the creation of our parish in March 2021, one the major challenges facing our parish and our community in general is scarcity of water. Regular consumption of unclean water has really caused serious health risk in our community.

However, the only available sources of water is ORA River located in our neighboring community at Amaezu. Both human and animal drink from the same source and one borehole which is about 30km away from the parish, worse still, you will spend some hours before getting water from it.

We sincerely promised to take a good care of the borehole should you sink it for us. Thank you so much dear father for your selfless services to humanity.

Yours Faithfully

18/01/2021

The Director,
Samuel Omogo Foundation (SOF)
Ohaukwu L.G.A Ebonyi State.

Sir,

APPLICATION FOR A BOREHOLE

We the entire people of Ndiegu Igwe Village Amoffia Ngbo in Ebonyi State do hereby apply through Samuel Omogo foundation (SOF) a borehole water.

The request is based on the necessity Italia.

- i. Our present source of water is very far from our abodes.
- ii. It is very mountainous to climb up and down.
- iii. The source of water is fowled with Animal and Dangerous Chemicals (Gamaline) by rascally elements of the community in want of Fish Rendering the only source of water unfit for Drinking.
- iv. The worst is that the only source of water does not last the season of the year.

We will be happy if our request is granted.

Dear Fr.,

APPLICATION FOR DRILLING OF BOREHOLE

We the Missionary Daughter of Mater Ecclesiae Congregation Abakaliki Diocese are the care givers to this orphanage with registration No: CAN/IT/115574.

The orphanage takes care of abandoned and handicapped children of various age, some of the children are homeless, some from difficult homes and some are with special needs ranging from HIV, physical and mental health issues. We cater for the needs of the kids including education and our only source is charity from individuals and groups.

Therefore, we humbly ask and plead that you support us in drilling of a borehole for drinking and for domestic use. Due to the scarcity of water especially during dry season, we have no other choice than to be buying water which many times we lack the fund or they will not supply when needed. If this application is granted the Community where we are will also benefit from it and the poor children will see water to drink and to keep their environment clean to avoid infections.

The sisters, the Catholic Charity Home for the Needy (Orphanage) and the people of the community where we are will be grateful if our request is considered needful. Thanks and God bless.

CONVENT HANDMAIDS OF THE HOLY CHILD
GOVERNMENT TECHNICAL COLLEGE, ABAKALIKI
EBONYI STATE

6

Director,
Samuel Omogo Foundation
Rev. Fr. Dr. Peter O. Omogo.

Sir,

APPLICATION FOR BOREHOLE

We the sisters of the Handmaids of the Holy child Congregation Managing Government Technical College, Abakaliki and residing in the premises are requesting for a borehole.

To be candid, water problem has been a source hindrance in our convent in various uses like cooking, washing in most of our activities both in the taking care of the mini poultry/ Goatry in the compound.

The students fetch water for our use from the school-well and most of the time we fetch water out of the school with our car or buy water from the tankers.

We will be very grateful if this is done for us to alleviate most of our water problems.

Thanks.

We remain, yours in Christ.

H.H.C.J Convent Azuiyokwu

No 17 Convent Road

Abakaliki

Ebonyi State

The Executive Director,
Samuel Omogo Foundation,
Abakaliki,
Ebonyi State.

Sir/Madam,

APPLICATION FOR SINKING OF BOREHOLE

I humbly request and do hereby apply to have a water well/Borehole sunk for us at our Farm to enhance our services. This request is as a result of the challenges of water scarcity we have faced over this years. The borehole will serve the farm communities around us and needs of the sisters as well.

I am a female religious belonging to the congregation of the Sisters of handmaids of the Holy Child Jesus (HHCJ) and working here in Abakaliki, Ebonyi State.

Ancilla Agro imitative was established three (3) years ages on March 8th 2019 here in Abakaliki at completing a course on Crop/Animal Farming, my superiors assigned me to open and run a Poultry Farm. In the 3 years of its founding, the farm has boost the food and meat supply of our State, thus providing our people with food and meat at affordable rates.

However, one of our greatest challenges has been scarcity nay lack of water supply. This factor has slowed down operations and affected the production rate of the birds and crops at large.

The necessity and importance of water to the ecosystem, to life in general can never be overemphasized. Hence, we make this application for the sinking of a

borehole for us, as this will ease the pressure and tension of having to daily hire water tankers at high cost and having to wait for days for them to deliver, during which delays, great damages have been done to the birds and crops.

On behalf of my superiors and congregation, we remain ever grateful to you for favourably considering our application.

Yours sincerely,

Rev. Sr. Modesta U. Nwonwe

Rev. Sr. Agatha Mouzie

Nigeria

Sir,

APPLICATION FOR A BOREHOLE

I wish to apply for a borehole in Azuiyiokwu community to provide clean and safe drinking water for the Sisters, the Convent School and the villagers.

The Congregation of the Handmaids of the Holy Child Jesus was established in 1931 by Mother Mary Charles Magdalene Walker (RSC) in Calabar, Western Nigeria.

The Congregation is dedicated to bringing literacy to women and Children with special option for the poor in addition to healthcare, social and pastoral ministry. We seek to support vulnerable people in the communities irrespective of gender, background; physical classification and functionality for the achievement of sustainable growth and holistic development of the community. We are dedicated meeting the needs of the disadvantaged minorities, impoverished and remote communities. We have the vision of transforming our communities and the world in Christ.

Azuiyiokwu in Izzi is located in Abakaliki Local Government Area of Ebonvi State. Nideria. It has population of about 5.000

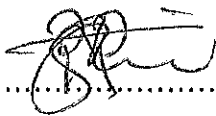

inhabitants who are dominantly traders, skilled worker, farmers and few Government workers. They make large families because they are polygamous.

They do not have portable water supply. Due to unavailability of clean and safe drinking water, the villagers resorted to sourcing for drinking water from, wells, diseased and warm infested ponds. This has resulted to many suffering from typhoid fever, diarrhea, guinea worm, cholera and other water borne diseases and some of them die in the process because they do not have the finance to treat them.

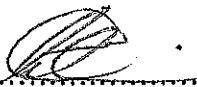

Based on the above scenario, we are requesting for your assistance in providing a clean and safe water source that would serve both the Sisters in the convent, the Convent School and the community thereby enhancing the health of the people by reducing the outbreak of water borne diseases.

Thank you for your anticipated favourable feedback. May God Bless and prosper your organization.

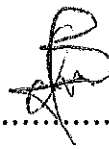

Yours faithfully,

Sr. Pricilla Anekwe, HHCJ.

Okposhi Eheku Ngbo
Ohaukuw L.G.A.
13th January, 2022.

Samuel Omogo Foundation (SOF)
Ohaukuw L.G.A.

Sir,

APPLICATION FOR BOREHOLE

We the entire people of Ndulo Ndiokota village do solemnly request your charitable foundation, Samuel Omogo Foundation (SOF) to please give us a borehole in our area.

BECAUSE OF THE FOLLOWING REASONS;

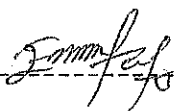

1. The stream we fetch is far from our village and the name of the stream is Ogbu-ngele stream.
2. Ogbu-ngele the only source of water we have, does not last beyond February every year, due to high pressure on the only water.
3. The number of people that fetches water from the stagnant water especially when students returns from vacation is better imagine than expressed in word. This leads to quarrels, fighting, and abuses as people scramble for the water.
4. As a result of the above, water turns muddy and unsafe for drinking, cooking and other domestic purposes.
5. Many students and civil servants is severely effected by the ugly trend.
6. At Ndulo Ndiokota, from the month of March which the stagnant water normally dried up. STUDENTS living in our area goes to school two to three times a week due to the reason for not getting early in the some days. The same applicable to civil servant.

7. During rainy season, the problem becomes worst because the

This makes the water unsafe for drinking, cooking and other domestic purposes. The only sources of water we have on rainy season is zinc water or the people of Ndiulo Ndiokota village travels to nearby villages to beg and search for water.

Please sir, if you consider given us a borehole you would have gone a long way making life very easy and interesting to the entire people of Ndiulo Ndiokota village because the adage that says; water is life is in deed true.

Dearest Fr.,

Application For The Provision Of Water Bore-Hole

It is with deep sense of commitment and responsibility that we the entire Parishioners of Immaculate Heart Of Mary Parish, Omego, Umuezeokoha, in communion with the Parish council and our dear Parish Priest, humbly appeal for the provision of a water bore-hole in our Parish.

Our newly created Parish is just about four-months old, with our Parish Priest still living in-residence outside the Parish due to inadequate finance needed to install some of the most basic items still lacking in the rectory (Parish). Provision of water is very crucial to us, the only source of water we have is the old water-well which is already on the point of collapse, dries-up irregularly, no longer able to meet the current-demand for water and had become a source of health challenge due to Guinea-Warm disease.

It is on the above need that we appeal for assistance from your kind and good-spirited (charity) Omogo Foundation. Provision of a water bore-hole will go a long way in helping us and the Pastoral work of our Parish Priest, living closer to the people for the conversion of souls.

In fact, our joy in great-anticipation shall know no boundary seeing this task accomplished by God through your Charity foundation.

We pray Almighty God to preserve you and continue to use you mightily in touching and changing lives / communities, and making our world a better place for everyone and for the salvation of souls in Jesus name. Amen.

Thank you once more and remain ever blessed.

The Director Samuel Omogo's Foundation (S.O.F)

Rev. Father, Dr. Peter Okwoeze Omogo

Ohaukwu Local Govt. Area

Ebonyi State.

Sir,

AN APPLICATION FOR THE REQUEST OF A BOREHOLE

We wish to apply for the provision of a borehole in our community at Alisakor Village in Okposhi Eheku Ngbo.

The aim is to alleviate our problems on the scarcity of water in our village which include:

1. Tracking of 15 kilometres to Inyimagu, Ameffia, Ngbo dam to mention but a few.
2. Lateness to work, and tiredness after tracking.
3. Meeting some wild animals and snakes etc on our ways.
4. Lastly to avoid some water diseases like diarrhea, Guinea worm, River Blindness and other water born disease.

Caring for the borehole.

The villagers will set up a committee who will be taking care of the borehole so that children and any other people will not destroy it, and to keep the surroundings clean.

So on this note mentioned above and others, we, the entire people of Alisakor village humbly apply for a borehole.

Thanks, and may God continue to bless you in Jesus name.

Through Rev. Fr. Dr. peter Omogo

**APPEAL FOR THE INSTALLATION OF BOREHOLE WATER AT RESCUE
OPERATION PRAYER AND EVANGELICAL MISSION AT EGWUDULEGU
VILLAGE UMUOGUDU AKPU NGBO.**

Sir,

I wish to appeal for your kind gesture on behalf of the above mentioned church on the above subject matter.

The water we drink and use for domestic purposes is very unsafe, our people suffers cholera, guinea worm, hook worm and other water born diseases, mostly young ones are the most affected.

The ignorance villagers excrete in the bush near the stream, which the flood carry in to the stream and also domestic animals drinks and swim in the same stream, with that the water becomes contaminated and so bad for consumption, but we have no alternative. Some that cannot afford to drink it spend a lot to buy sachet water, others travel far to get borehole with many miles away.

Sir, we really need your helping hand through your foundation Samuel Omogo Foundation to install in our church at Egwudulegu village Umogudu Akpu Ngbo, and we promise to make use of it wisely, it will help us to overcome the water born diseases, children does not go to school earlier as they go about searching for water in the morning which they spent much time. We are really in much nee of water as you can see the picture of our deplorable state of our pond in this season, it get worst by March till May where you spent 4 hours to get to your turn waiting for the pond.

Thanks for your cooperation as we wait for your respond.

United state of America.

Sir,

APPLICATION FOR DRILLING OF BORETHOLE

The parish priest and the entire members of St. Simon's Anglican Church Parish Aguobodo ii Ezzagu, humbly request and apply for drilling of borehole in our Church for community use by your foundation. This is because of the scarcity of water in our area especially in dry season.

There is no other place in our village where we find good water, except pond (okpuru) which has caused great harm to the people of the community, leading to skin diseases, diarrhea and other water borne diseases.

Furthermore, there are about five hundred (500) households that amount to 1,500 persons that will benefit from the bore-hole when drilled, as the borehole will be the first of its kind in the entire village.

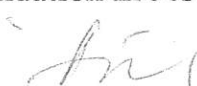

We also promise to use the bore-hole judiciously if it is drilled. We shall also be very glad if our heart desire is granted.

May the lord continue to bless you and this great foundation in Jesus name, Amen.

 Rev'd Fr. Dr. Peter Omogo

Sir,

APPLICATION FOR THE DRILLING OF WATER BOREHOLE

We, the Priest, the Parochial Church Committee (PCC), and the entre members of Christ Anglican Church Ekeru Inyimegu Izzi in Abakaliki Local Government Area, Ebonyi State, humbly wishes to appeal and request for a construction of water Borehole from your Foundation (Samuel Omogo's Foundation) to our Church, Christ Anglican Church Ekeru Inyimegu. Sir, because of the Geographical location of our church, it has been a retreat and camping arena of our Parish, Archdeaconry and Diocese. The scarcity of water in Ekeru Inyimegu Community always affects the smooth running of our programs.

Most of the times, the situation becomes worst when most of the delegates will not see water to bath, even for cooking. Some will spend two or three days in the camp without bathing. More also, the scarcity of water in Ekeru Inyimegu Community sometimes affect the comfort and performance of the Ministers posted in the church.

Please Sir, we beg you in the name of the Lord to help us solve this water problem in our church, it has been a great challenge to us.

We will forever remain grateful. Thanks for your anticipated response, may God continue to bless and reward you immensely.

APPLICATION FOR A BOREHOLE IN OUR CHURCH

Our dear brother in Christ, having seen the numerous help and good things you do to people despite where they come from, we have known and believe that you are a good ambassador of Christ. Infact, the bible said that it shall be well with the righteous, Amen.

Sir, we the entire members and leaders of Calvary Methodist Church Alioma, wishes to apply for a borehole in our church for the work of God and nearby households.

We have no good drinking water, the only spring near the church is been much populated every time. Imagine were our Minister and his children leave the work of God and spend their time to fetch water themselves.

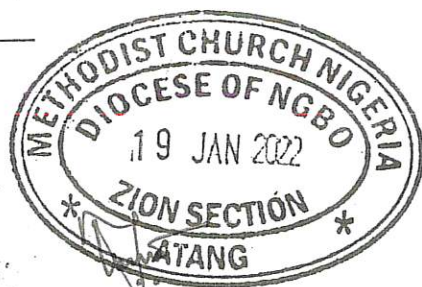

This dirty and scarce water has caused a lot of problem to our members such like Guinea worm dysentery and diarrhea. We hereby plead and promise to take good care of the water as God shall continue to bless you and your foundation in Jesus name, Amen.

Sir,

APPLICATION FOR A BOREHOLE

We the entire members of Wesley Methodist Church of Nigeria, Igwelede Oha in Zion Section of the Diocese of Ngbo. Do humbly wish to request your assistance for good portable water supply via a borehole.

Sir, we please solicit your help because as a premier church in our community, we lack good drinking water for our members and the surrounding households especially during the dry seasons. The situation exposes our members to source for especially drinking water from unimaginable sources that brings about ill-health from time to time. The ministers of God subsequently suffer this lack a lot since they are more resident in the church community.

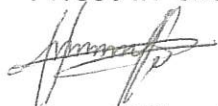

Sir, we therefore hope that this request and application shall be given a favourable consideration. Trusting that the Almighty God shall grant you all Divine enablement in Jesus Name. Amen.

Remain ever blessed.

Father,

APPLICATION FOR DRILLING OF WATER BOREHOLE

The above mentioned school writes to apply for the drilling of water borehole in the school environment.

This is because the scarcity of water supply within the school environment since the creation of the school till date has made some of our students to run into accident on the bid to search for the water. The location of the stream is far from the school for students to fetch water. They have to travel some distance before getting the water and this has pose serious danger to the lives of the students. We therefore, solicit for your intervention in this ugly situation.

Thanks for anticipated approval.

**APPLICATION FOR INSTALLATION OF PIPE BOREHOLE WATER AT
HEAVENLY FAMILY GOSPEL CHURCH, LOCATED AT NDIEZE OBOMALEGU
UKWAGBA NGBO, OHAIKWU L.G.A. Reg. No: CAC/IT/NO 54731**

The church members of the above mentioned church hereby wish to apply for the installation of pipe borehole water at the church premises located at Ndieze Obomalegu Ukwagba Ngbo.

We are always in a state of agony for lack of good drinking water within the environs.

The deplorable state of ponds and streams which we drink causes great havoc to the health conditions of both the members and others within the vicinity as many are infected with guinea worm disease, cholera, typhoid fever, etc. because of contaminated streams and ponds by nomads, mad people, lunatics, animals etc.

Also, much are spent by members (Both Adult and children) who travels long distance in search of a better source of water which sometimes end in futility.

We therefore, solicit your foundation to consider our plight as to giving us a positive consideration as it will help to alleviate our sufferings and prosper the Gospel work as were the case of other churches your foundation have remembered.

Attached here included: the certificate of incorporation, photographs of deplorable state of our streams, church members etc.

Thanks

Yours faithfully,

Samuel Omogo Foundation

Sir,

REQUEST FOR DRILLING OF BOREHOLE.

With pleasure, we the management, staff and student of St. Mary's college Umuogudu Oshia Ngbo, hereby request for drilling of borehole in our school. The unavailability of drinking water in the school premises had exposed both staff and students of the school to serious hardship in search of drinking water, especially during the school hours.

This had led to loss of life of the students as a result of water borne diseases like; cholera, Guinea worm etc. If the borehole is drilled, it will go a long way in assisting the students and staff and will enhance effective teaching- learning.

Thanks for your anticipated consideration.

Yours Faithfully,

Mr. Linus Odo Efi

APPLICATION FOR SINKING BORHOLE

We of the above named school really great and appreciate you the amiable father, for how God has been using you for many great works especially help, villages, communities, states beyond out from negative effect from scarcity of good water. We the entire prudent Child Nursery and Primary School are praying that God Almighty Father will ever remember your good works Amen.

Sir, We use this opportunity to apply for the construction of borehole for our dear school because of negative effects of water scarcity we are facing in our environment. We have no good water to drink, as a result of that pupils sick always some and dirty in so much that they contract disease from what they eat, drink. They come to school very late when they search for water to take they bath, it distract they attention from study. Living is greatly effected. Please sir, we will be grateful if you come to our aid.

We believe with your help this project will be achieved.

Great father, thanks in anticipations

Rev. Father,

AN APPLICATION FOR BORE-HOLE

We the pupils of Ndiagu Ngbo Primary School Ngbo wish to apply to your office to assist us to get borehole because we don't have good water for drinking.

The stream is far from our school and before we could go and come back it is already mid-day and we will not attend school, the farness is about 20km away from the school and the most dangerous thing is that the water is hazardous to human health because it contains diseases like guinea worm, round worm and others.

Therefore, father, we are your children looking unto you as the human messiah of this life today to sort out our problem.

We will be very glad if our request will be given favourable consideration.

Thanks.

20th January, 2022.

The Chief Executive Officer/
Managing Director,
Samuel Omogo's Foundation,
Rev. Fr. Dr. Peter Omogo.

APPLICATION FOR DRILLING OF WATER BOREHOLE

The village Head, the Executives and indeed the entire villagers of Ekeru Inyimegu village in Abakaliki Local Government Area of Ebonyi State humbly request for the construction of water Borehole from your kind and generous foundation (Samuel Omogo's foundation) at our village market square.

Sir, this request is made due to the village political geographical location that marked the village out from Izzi Local Government Area and attached it to Abakaliki Local Government Area but separated from our local Government by Ebonyi River. Due to this location of the village, we have completely not received any social amenities from Government. We lacked electricity, schools, good road, good water source, all our graduates are unemployed making the entire village live a miserable life.

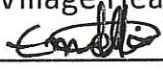

This appeal for construction of water borehole is of paramount important as some of the village members have been drowned in Ebonyi River and the pond in the village. Some have contacted different sickness as a result of contaminated water source.

We humbly beseech thee to come to our aid to enable us have good source of drinking and bathing water. We pray that God will keep strengthening you in this good work you started.

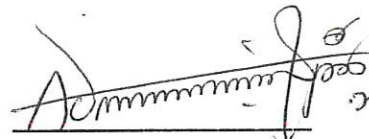

Thanks in anticipation of your kind approval and response to the deplorable conditions of Ekeru Village.

Dear Rev. Father,

AN APPLICATION FOR THE PROVISION OF WATER WELL (BOREHOLE) IN OUR COMMUNITY

On behalf of the members of our village – Nchoko Igbeagu in Igbeagu autonomous community of Ebonyi State, we humbly apply and bring to your notice that since the creation of Ebonyi State 1996 our people have only source of drinking water from only one village pond called Okpuru where human beings and animals are drink together. The effort we have made to attract one borehole from the Government proved abortive.

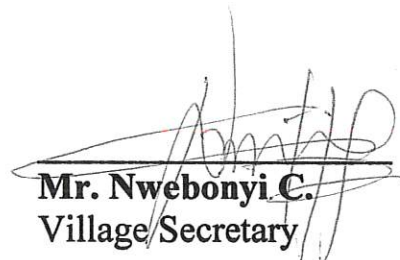

As information came to us that you are rendering selfless and humanitarian services to people like us, we decide to apply for your help so that our people will stop drinking from pond. The pictures of where our women and children are struggling to fetch water are attached at the back of this application.

If the water well is dug in our community it will help to reduce or totally stop water – borne diseases – such as ginea – worm, cholera which our people do suffer after drinking the pond water. And we shall take proper care of the water well.

AN APPLICATION FOR BOREHOLE.

Sir,

We the members of Assemblies of God Church and the entire Oshariji Village wishes to appreciate Your good handwork towards groups, churches, schools and individuals in different areas of life and also thanking you for not segregating for whatsoever you are doing to the people of Ebonyi. And we are saying may God almighty who blessed Solomon in the olden days continue to bless you beyond human reasoning in Jesus name Amen.

In the other hand, we are pleading that you may come to our rescue by providing with us a borehole water that will be serving up to two hundred and fifty household in our area who are suffering from scarcity of water to drink first.

This will stop guinea worm and cholera that stands as the order of the day in our area.

Apart from this reason, scarcity of water causes our children lateness to the school every day because, they can spend up to two hours going and returning from the pond that they use to fetch water. Not only that, provision of borehole water will help and stop dirtiness of our children as well as their parents.

These are some of the reasons why we are soliciting for borehole which will help and stop the suffering of the people of the area.

Long live Samuel Omogo Foundation

Thanks,
Yours faithfully,

For Samuel Omogo Foundation (SOF)
Sir,

A REQUEST FOR DRILLING OF BORE HOLE IN OUR VILLAGE

We the entire aforementioned village thanked God for his infinite mercy in brining you our illustrious son to his vineyard and also give you impetus to remember your people calamities and predications and have mind to come to their aids.

We say to God be the glory in Jesus name, Amen.

Father, I humbly request to this foundation to help us in drilling a bore hole in our village (Ndiagu Oseh Okposhi Eheku Ngbo). This aforementioned village has suffered allot in terms of water for drinking and for domestic uses.

We have only two streams that last for only four months in the raining season while the remaining months of the year are months of dry season for us.

This lack of water has course so many sickness and diseases in our village such as guinea worm, cholera, typhoid etc.

Our people track up to 36 kilometers before they get water from Ebenyi Ezillo stream. And as such so many people involved in raping, kidnapping, fatigness and sickness etc.

Our children can no longer regulate themselves in school at that season because of this problem. Our domestic animals dies regularly because of the same problem etc.

Please we shall be very happy and grateful to God if this our request is favourably considered.

Thanks for your anticipated co-operation.

APPLICATION FOR A BORE HOLE WATER FACILITY

I Elom David Chidi on behalf of the well meaning people of Amechi Ndiegu Ishimkpuma in Ohaukwu Local Government Area humbly request for the provision of a borehole water facility in the locality.

This request is necessitated by the untold hardship being faced by the people of this locality in accessing drinkable water. This hinterland has been long neglected by the Governments in power not minding incessant requests by the Hoipoloi.

The absence of safe drinking water in this place has made the dwellers to resort to dirking stagnant water from Messy pounds and poorly stored rain water year in year out. I solemnly implore you to come to our aid in your magnanimity so as to salvage us from the health risks this has posed over time.

Thanks for your anticipated consideration and approval.

Sir,

Application For Award of Portable Water (borehole) to our Community

On behalf of the stakeholders/Elders of Imenyim-Ekebeligwe Ishieke community, Ebonyi L. G.A. I hereby solemnly apply for the award of portable borehole water to our community.

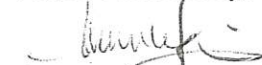

Imenyim-Ekebeligwe Ishieke with a population of about twenty thousand (20000) people has no portable drinking water since her inception. The only source of drinking water after rainwater are okpuru-enyim pond and ogbogbo stream, which you can imagine its health consequences to our people. The ingestion of the unwholesome water has led to outbreak of water-borne-diseases (eg cholera, typhoid) especially in the dry seasons. Also, people trek quite long distance in order to fetch the water, which exposes them to various accidents.

Attached herewith are the photographs of the two water sources in the community.

The community will be very grateful if this humble application is granted.

Thanks.

Yours Faithfully,

Mrs. Rita Mgbabor U.

Ohaukwu Local Govt Area.
Sir,

**APPLICATION FOR A BOREHOLE TO BE SITED AT ELDER ISAAC
ALAGBA'S COMPOUND**

We the members of Nduagu Akpaka Inyimagu hereby apply for a borehole due to the perennial difficulties we face in our area/ community because of the water scarcity, in which a lot of time and energy in are wasted in search of water.

We believe that bringing the borehole nearer to us will end the incessant quarrels, fighting, braking of water pot and containers and outright enmity occurring daily at the few available sources of water.

Above all we hope that the provision of a good source of water like the borehole will help in eradicating water born diseases such as guinea worm, cholera, typhoid and malaria that is prevalent in our community.

In the light of the foregoing, we hereby apply for the borehole to be sited at Elder Isaac Algba's compound at Inyimagu, Okposhi Eheku Ngbo in Ohukwu L.G.A. Ebonyi State.

We seize this opportunity to thank you in anticipation that our application will receive a favourable response. We appreciate and thank you also for the good work you are doing in our time its said that "water is life" therefore the who gives water, gives water, gives life. You have been giving lives to various communities and families across the generation. May God continue to bless and reward you.

The Founder/Executive Director
Samuel Omogo Foundation.

Dear Father,

APPLICATION FOR BOREHOLE

We the leaders of the above named community development union write to express our appreciation to you and your foundation for the good gesture of providing portable water which is one of the basic necessities of life to the citizens of our state Ebonyi and especially to one of our villages in Isowhumini II last year.

Isowhumini II as a community is made up of 8 villages with no portable water except for ponds and rivers. Lack of portable water in our community has become a perennial problem resulting to lots of health risk including water borne diseases such as cholera, diarrhoea and river blindness.

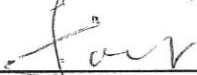

In the light of the above, we humbly appeal to Samuel Omogo foundation to help us in the provision of portable water by drilling borehole for our community to be sited at Imebor village Isowhumini II Ezekuna.

We will be grateful if our application is favourably considered.

Our prayer is that God will uplift Rev. Fr. Dr. Peter Omogo as he continues to provide life basic need to Ebonyi people.

The Chief Executive Director/**OFFICER**,
Samuel Omogo Foundation (SOF),
Umuogudu Oshia-Ngbo,
Ohaukwu Local Govt. Area,
Ebonyi State.

Sir,

AN APPLICATION FOR BORE-HOLE.

Sir, we have over the years hearing of the good works of your foundation.

Your foundation has provides a lot of bore-holes to many Homes, Churches, Villages and Communities in Ebonyi State and Nigeria at Large.

However, Sir, your foundation has did a lot of philanthropist works and promote welfarism by providing sources of water to uncountable human beings and as the result of that save the lives of many peoples.

Sir, we wish if your foundation can assist Ogbodo Village in that same water provision. In our village, we have 7 zones with population of 1,435 but there is no quality and sufficient water for us to drink. Ladies and Men walked more than 10 kilometers miles to arrive where they can fetch water.

However, in our villages human beings and animals drink in the same stream which is very harmful to our health, this is because of lack of water in our village. Sir, drinking from an open and unprevented stream together with an animals has cause a lot of sicknesses to us which many people has lost their lives.

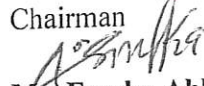

Sir, we will be grateful if our application can be granted and put into consideration so that your foundation can wipe out all our cries and put a simile to our faces on water provision.

Thanks

OHAUKWU LOCAL GOVERNMENT AREA

EBONYI STATE, NIGERIA,

Our Ref: _____

Your Ref: _____

Date: 20th January 2022

Samnuel Omogo Foundation (SOF)

C/O Rev. Father Dr. Peter Okworeze Omogo

Sir,

APPLICATION FOR BOREHOLE DRILLING

We the entire members of Ndiagu-Ishiji village in Amaeku Autonomous community of Ngbo, sincerely wish to apply for borehole drilling in our village area.

History background of Ndiagu-Ishiji is one well known village in Amaeku Ngbo bounded in East, with Ndiulo in West with Ojiegbe village, south Ndiagu Nwede, and North Inyimagu respectively, with estimated population of 1800.

However, Ndiagu-Ishiji from the history is purely Agerian village, mostly crop and livestock farmers civil servants, but obviously in their historical background one of the major problem obstructing the growth of the village is the long lasting scarcity of water and consumption of the available unclean water on the village for both drinking and domestic uses, the okpuru-umuefe unclean and unacceptable pond has been the only source of water in history of Ndiagu Ishiji village, which is situated at about 30kms away from the village.

This constraint has caused very serious havoc to the teeming population for years which includes as below:-

- Persistence increase in death rate (i.e. premature death among the villagers as of the water borne diseases and other related bacterial infections, such as Guinea worm, cholera, diarrhea, tuberculosis, etc.
- Child mortality and maternal death has been increasing persistently as the result of consumption of unclean Okpuru-Umuefe local pond.
- Poor performances of the school children as the result of lateness to school on daily basis, take for instance most of the school children, often search for water

every morning before leaving to school which basically affect their performances in the school.

- Special person such as people with disability and also age people; These group of persons in Ndiagu-Ishiji has been dying in pains as a result of their inability to have access to such fair unclean pond as the water is one of the basic necessity of life.

Therefore, the proposed borehole will benefit us a lot by providing lasting solution to our long lasting problem of water scarcity in Ndiagu-Ishiji Village.

We promise to give all the necessary hygiene, maintenance and protect the proposed borehole.

May God bless Samuel Omogo Foundation and entire family for their good work so far in Jesus Name:

Attached are the photographical views for your kind consideration.

Rev. Fr,

REQUEST FOR BORHOLE

We the Ndiagu nwuro in Ndiagu Ogba village of Umuogudu Akpu Ngbo, humbly apply for a borehole water from your foundation to help reduce the incidence of water scarcity and its consequence for example;

- (a) Our people have to travel distance of up to 20km before they could get water.
- (b) The water if gotten is always dirty to the extent that we use alum in order to make it clean.
- (c) Our people suffer from diseases as a result of bad water such as Guinea Worm, Cholera, River blindness, Diarrhea, Dysentery and other related water diseases.
- (d) Our people have also been suffering from difficulties of scarcity of water such as falling sick, hunger, accidents for dangerous animals and even death.
- (e) Our people use to fight, quarrel, which causes hatred and curse in the village as a result on how to get water for demotic's services. It also cause delay for our children to attend school late and to church services.

Based on above, we sincerely request for a borehole water to assist us to reduce our hardship as a result of scarcity of water and bad water.

Sir,

APPLICATION FOR DRILLING OF BOREHOLE

We the entire people of Ogbaele community in Ndaburu Ebonyi Umuogudu Oshia Ngbo have been lacking good sources of water for so many years. All our need is water (borehole water) in our community, which we appeal to you to use your good office and drill a borehole for us through your Foundation, Samuel Omogo Foundation (SOF).

The only source of water in our area is stream, pond which causes a lot of diseases like typhoid, cholera guinea worm etc.

We will be happy if you come to our aid to avoid water borne diseases and also help our children to go to school early.

Thanks for your cooperation.

APPLICATION FOR A BOREHOLE

We, the parishioners and people of Ezeakataka Agbaja Village, Izzi Local Government Area of Ebonyi State heartily apply for a slot of water well (Borehole) in our Church Premises (St. Patrick's Parish Ezeakataka). This borehole if sited at this location will provide the church and villagers with portable water as our source of water supply is not good for consumption.

We promise to look after the borehole and maintain it adequately if approved.

We enclose herein photos of the existing source of water which is the village pond and the borehole maintenance Committee.

Humbly submitted for your kind approval.

Ndimbam Agbaja Village
Izhi LGA
Ebonyi State – NIGERIA
Wednesday, January 19, 2022

The Management,
Samuel Omogo Foundation,
Ebonyi State – NIGERIA.

Sir,

AN APPEAL FOR HELP

I write, on behalf of the good people of Ndimbam-Agbaja, Izzi LGA of Ebonyi State to humbly request that borehole(s) be sunk in the above named village.

Ndimbam Village is one of one of the most populous villages in Agbaja Community as its estimated population size is 6, 195 persons (*413 households with the average of between 9-15 inmates*). Sadly, there is no clean and safe water source available to that population save for 2 ponds and *Enyim*, a river located at Onuenyim Agbaja, a neighboring village. Both water sources are so unclean that the villagers are always suffering from water related sicknesses and other grave inconveniences.

Given the population size of the village and what that population goes through to access water at all, I would passionately request that the Management of SOF approves the sinking of 2 boreholes at two strategic locations to better serve the villagers especially the elderly, aged, and school children who are the most vulnerable. Nonetheless, we will be grateful for whatever decision the Management of SOF makes for us.

We cannot appreciate enough what the SOF had done within Ebonyi communities and without to provide hope to the needy, alleviate the suffering of the poor, and give succor to the helpless. We request, then, that such help be extended to us in the area of safe-water-source provisions. We remain in prayerful anticipation and in hope that our appeal will be given a considerate ear and favorable response.

Rev. Fr. Philip Uguru
Villager

Signed:

Sir David Nwojiugwo
Village Councilor

Attached at the back of this application are Assessment Form, Copies of Photographs of the water sources available to the villagers and a Photo of the people who would take custody of the borehole(s) if it is eventually approved and sunk.

NDIESHI VILLAGE AGBABA

AMAEKU AUTONOMOUS COMMUNITY NGBO

CHAIKWU L.G.A

EBONYI STATE, NIGERIA

Our Ref: _____ *Your Ref:* _____ *Date:* 20th January, 2022

Samuel Omogo's Foundation

C/O

Rev. Fr. Dr. Peter Okworeze Omogo

Sir,

APPLICATION FOR BOREHOLE DRILLING IN OUR VILLAGE PLAYGROUND

We the entire people of Ndieshi Agbaba village Amaeku Okposhi Ngbo, wish to apply for borehole drilling in our village playground to question the problem of the scarcity and consumption of unclean water from the origin of Ndieshi Village.

HISTORY BACKGROUND OF NDIESHI VILLAGE

Ndieshi village is one of the oldest and first villages mapped out from the old Okposhi Eheku community with estimated population of about four thousand (4000) people. Practice of Agriculture is their only source of income for living. Ndieshi village is bounded with Ndiagu Nwede, Promise-land, Otuokpeye and Ndiagu Oge as well. In the history of Ndieshi village, one of the problems upsetting their growth is the scarcity of water and also the use of unclean local water pond in the village called Ogwema unclean pond for both drinking and domestic use. However, the most contaminating part of this situation is the common and general consumption of the pond by both human being, birds and animals and this has led to the untimely death of young person's yearly as the result of the outbreak of the different kinds of water borne diseases cum bacterial infections such as tuberculosis, laser fever, cholera, guinea worn and fungi and of recent the increase in the death rate became uncontrollable as both the youths, children and adult fetch water from the same unclean pond.

Sir, use your God sent charitable foundation to run to our aid to rescue us from this long lasted problem that has mostly contributed to undeserved suffering of the youths, school children, aged, special persons and pregnant women as the even available Ogwema unclean pond is situated at about 35km away from the Ndieshi

Village and always overcrowded and has equally led to the dispute of different kinds as the result of struggling to fetch the water per turn.

We promise to provide all the needed hygiene and sanitation in our village and to protect and guide the proposed borehole in order to arrest and combat the situation permanently.

May God Almighty bless the Samuel Omogo's Foundation and their entire family and also every other hands that contributed to this development strive in Jesus Name; Amen.

Thanks for your kind consideration.

The Chief executive
Samuel Omogo Foundation
Umugodu Oshia
Ngbo

Sir,

APPLICATION FOR BOREHOLE

We, the good people of Ndiagu Ukpa, Ndulo Umuogudu Akpu Ngbo humbly apply for the drilling of borehole in our village.

The village has no clean drinking water, the source of our water is from pond water and Ituma stream. This has caused water born diseases in this village.

The village will be most grateful if our application is given due consideration.

Thanks as we look forward to your approval.

Yours faithfully,

Omeh Njoku John
For: Ndiagu Ukpa Village

Agbaenyi, Ibam Village,

Ikwo Local Government Area,
13th January, 2022.

Rev. Fr. Dr. Peter Omogo,
Chief Executive,
Samuel Omogo Foundation,
Ohaukwu Local Government Area,
Ebonyi State, Nigeria.

APPLICATION FOR DRILLING OF BOREHOLE

We veneratefully wish to apply for the generosity of Samuel Omogo Foundation to drill borehole at Agbaenyi location of our village (Ibam).

This request becomes imperative in view of the fact that the two sources of water (Ebonyi River and Okpuru Nwogwu) for Agbaenyi people of Ibam are not acceptable for drinking and domestic purposes as both animals and human beings drink from the same source. Worrisomely animals and human excreta through running water drops into the sources thereby constituting health hazard.

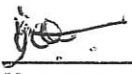

Again, while Ebonyi river that takes longer time to dry up in most parts during dry season is very far to us, the Okpuru Nwogwu although nearer, dries up in every February thereby creating acute water scarcity to the people.

May we finally state categorically here that your positive attention to this request will not only reduce the age-old death rate associated to drinking bad water by our people but afford us the opportunity of celebrating God's intervention and Rev. Fr. Dr. Peter Omogo in our village and lives for the good gesture.

 Umu Ogudu oshia Ngbo,
 Ohaukwu L.G.A.

Sir,

APPLICATION FOR BORE-HOLE

We the entire members of Udoka village after our village general assembly on 31st December 2021 resolved to apply for a water – bore-hole, from Samuel Omogo foundation. The inhabitants of the above village have been suffering from untold hardship in finding water for our daily-domestic use and drinking especially during dry seasons.

Our available sources of water in this village are old Nigerian pond along Okwerike, Agugwu road and streams which are not only very far from us but are seasonal and we used to go to our neighbouring communities to borrow water from their own bore-hole; irrespective of the long distance, some of our children go to school late or absent themselves from school because of water problem.

We shall be very grateful if our application is given a favourable consideration.

Dear Rev. Fr.

APPLICATION FOR A BOREHOLE FOR MY CHURCH AND VILLAGE:

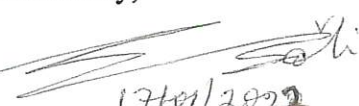

We humbly apply for your blessed foundation to site a Borehole for our above named church. As the same will serve both for the church and the villagers.

Our existing village dam known as –Enyim Effiemgbabu is indeed undesirable. As both human beings and animals drinks from the same dam. It has caused unimaginable ill-health such as; guinea worm, cholera and other harmful diseases to the church and the villagers. The distance of the dam to many is not what to talk about.

Very grateful shall we be if, our request is acceded to.

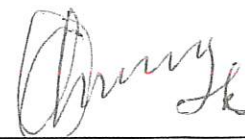

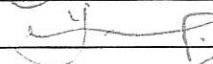

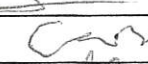

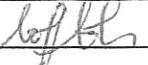

Thanks immensely Fr, for your anticipated kind gesture.

Yours faithfully,

Sir,

APPLICATION FOR ASSISTANCE FOR BOREHOLE

All glory to God for remembering the needy in this selfish dispensation through you and your foundation. You are a rare gift to us, providing the most essential commodity in the world. God bless you sir!

Sir, lack of good water has contributed 70% to the sufferings of the village in general and to the Presbyterians in particular. Everybody in the village, including the Presbyterian Revd. depends on Ebonyi River as our only major source of water. This water though bad Human Beings and nama (cow) to struggle to have it.

We have discovered that the rate of illness is always of the increase during dry season. We attribute to it the bad water from Ebonyi River we are drinking. This water is filled up with decayed leaves, wood, dead animals and other harmful materials capable of taking our lives if not that God is on our side.

Infact lack of good water increased our hardship generally, some bathe and cook with sachet water. Some runs miles in search of water thereby abandoning their lawful businesses. Many neglect church programmes for that same reason. Pastors and Reverends struggle with the villagers on who would climb down and up the river.

Notwithstanding, we are singing a song of victory already knowing that God will use you and end our sufferings as He has used you in other places as your record speaks volumes.

USA.

Dear Rev. Father,

AN APPLICATION FOR THE PROVISION OF BOREHOLE IN OUR COMMUNITY

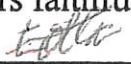

With God all things are possible. We thank God for creating somebody like Rev. Fr. Peter Okwoeze Omogo. Who came, saw and conquered, without him we cannot dream of applying for a borehole freely.

Father, we humbly apply for a provision of a borehole in our community because our only source of drinking water is a village pond where animals and human being drink together. And worst of it, is that it dry immediately when the raining season stop. The pictures of where our women and children are struggling to fetch water from the pond are at the back of this application.

Father, this initiative you provide to our people to give life and reduce their suffering in the area of scarcity of water, God will continue to uplift you wherever you are going.

If the borehole is dug, we shall take proper care of it bearing in mind that it comes to us through the work of Almighty God.

Samuel Omogo Foundation

Sir,

REQUEST FOR WATER BORNHOLE.

We the people of ikelegu ndieze inyimagu village wishes to express our profound gratitude to Samuel Omogo foundation for your magnanimity and good deeds in helping people from all works of life to better their living.

The good work that Samuel Omogo foundation is doing is incomparable and second to none and we say may God bless you father.

Furthermore, we wish to request for a water born hole in our village because we have none, we have being battling for a good source of drinking and cooking water and we know that your organization can be of great help to us.

The pond we have is not good for drinking, as both animals and humans drink from the same water source. Often times, there is an outbreak of water borne diseases such as Cholera and typhoid because of the dirty water. A lot of women and children find it hard to access the water because of the distance. There is also a scarcity of water because everyone in the village depends on the pond as a source of drinking water. It takes about 30 minutes for the turn to get to another person. And it takes about Ten kilometers (10km) to get to the stream.

We are seriously facing the challenges of a good drinking water source.

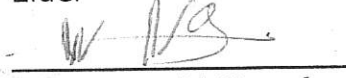

We will be very grateful if our request is given a favourable consideration.

Thanks and God bless you.

Okposhi Ehekun Ngbo
Ohaukwu L.G.A.
Ebonyi State.
20th January, 2022.

The Director,
C/O Rev. Fr. Peter Omogo
Samuel Omogo's Foundation
Ebonyi State.

Rev. Father,

AN APPLICATION FOR DRILL OF BORE-HOLE

We the entire members of Egu-Okoro Village Okposhi Ehekun Ngbo humbly wish to apply for your assistance to enable us get good drinking water through your foundation.

Father, one of the major problems of this village is lack of good drinking water because the water we drink is mainly ^{from} stream and the stream is away from the village at about 30km away and many diseases are contacted from that stream such as guinea worm, Bilharzia, Round worms (Ascaris) etc. and there are some problems that it create to the villagers:

1. Pupils and students do not go to school sometime because they are in search of water.
2. After tracking about 30km to the stream and come back with 25 container of water, going to normal activity becomes problem.
3. This stream will dry during dry season and become spring water which goes in turn by turn.
4. People go there in the night to fetch water a times there will be snake bite.

Therefore, father, we will be very pleased if our application will be given favourable consideration.

Thanks.

 Umuogudu Akpu Ngbo
 Ohaukwu LGA.

Dear Father,

APPLICATION FOR BOREHOLES FROM YOUR FOUNDATION

Father, we the Widow's name above appreciate all your good works, effort to our people, widows, childless people, Orphans, father you're a saviour to humanity here in Ngbo-ejiogu and South-East at large. May the good Lord continue to guide/protect, increase you in Anointing, Grace. Power till your age of 120 years as in Gen. 6:3

Father, Sir, we the Widows Interceding Prayer Ministry Ndiagu Nwauro village Ekwashi chapter. Our major reason why we need the water borehole were;

- (1) The same water we drink is also were all animals drink water that make it contagious to human being
- (2) It's too distance to our people, old women cannot reach it
- (3) Because of this causes diornaha, cohleoria, liver blindness, gunieworm etc
- (4) Scarcity of water brings thing down, cause lateness to our children in school and work.

Please father, we are appealing for your help, towards waterskin project under you foundation to help us and give boreholes two or three boreholes here in Ndiagu Nwauro village in Ekuashi to enable our pepole less sufferings of water and get good health as well.

We will be more happy if our request is considered and accepted.

Thank you father for the good job well done, remain bless Amen.

Yours faithfully,

Signed

 Mr. Emeka Aliobu

REV. FATHER,

AN APPLICATION FOR A BORE HOLE

We the entire people of the above village wish to apply to your office for a bore hole to reduce our suffering and maintain a good health.

We have a little stream which dries up before January which makes us to travel far and wide in scared of water yearly and this has made us to depend on you as the last hope of a drowning man. We are requesting that you use your office to let us out of this mess for our good health and comfort.

We will be very happy if this application is given a favorable commiseration.

Thanks.

Ohaukwu L.G.A.

Dear Fr,

APPLICATION FOR A BOREHOLE

I humbly apply to your foundation to drill a borehole for us in our village.

My village Ekerigwe Ndiaguazu Umuoghara, have been suffering for a very long time because of lack of clean water supply. The only nearby source of water in my village are open ponds where man and animals compete together for water. This has led to water borne disease like guinea worm, cholera and so on.

We shall be very grateful father, if our application is granted as we promise to take good care of the borehole if drilled.

Yours faithfully,

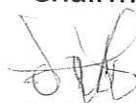

Mr. James Emeka
Borehole Assistant

**APPLICATION FOR THE INSTALLATION OF PIPE BOREHOLE
WATER AT NTSURAKPA PRIMARY SCHOOL EZZANGBO, IN
NDIEGU-NWANKWU VILLAGE: Reg. No: OH/06**

We would like to use this medium to appeal for your help on behalf of the above mentioned school name on the above subject matter.

The water our children want to fetched before they drink are very far distance from the school premises and the water is unsafe. Typhoid fever, guinea worm, cholera etc. the move in village where the water situated and it is seriously affecting the adults and the children. People in the village excrete in the streams, wash in them and also drink alongside nomadic animals. The water has been so polluted.

The school children and neighboring citizens within the vicinity travel about five kilometers or miles to fetch drinkable water which sometimes proves abortive.

So we really need your helping hand through your foundation Samuel Omogo foundation to install in our school at Ndiegu-Nwankwu Village, Ntsurakpa Ezzangbo a pipe borehole water to enable our children overcome some water borne diseases.

We hereby solicit your foundation to consider our plight as to given our appeal favourable consideration.

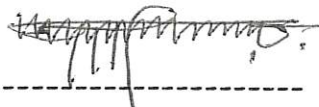

We attach the photographs of the deplorable state of ponds and streams that our children drink.

Thanks

Samuel (SOF)

Dear Sir,

APPLICATION FOR A REQUEST OF BOREHOLE WATER

We the people of the above mentioned address wish to apply for a request of (Samuel Omogo Foundation Borehole project), Ndiagu Utobo autonomous village is one of Umuezeaka village located at along (Ogwudu Odomoke Raod). Having a boundary with (Odomoke Izzi Community) by South.

Sir, since the old Anambra, Enugu and the present State our village have not been opportune to benefit any from our government, having hear the good news and seen the God did of this foundation we decide to come and join others in testifying.

We affirm to be honest and obedient with any given condition and abide by the rules and regulations.

We also state be a business friendly with any person we may come across during and after the project in terms of discharge our duties.

Sir we will be very grateful if our application will be considered with a negative response.

Thanks and God bless.

Ikpo -Nkpuma Abarigwe
Umuogudu – Oshia Ngbo
Ebonyi State.

Sir,

APPLICATION FOR BOREHOLE WATER PROVISION:

Based on the issue of water scarcity in our area of location, we write this letter; asking you to permit us to partake or benefit in this divine grace of water provision, in which God is using you to do in Ebonyi State.

Father, we are facing lot of challenges resulting from lack of good water for example, some of water borne diseases such as guinea worm and thread worm have left some lives miserable. The distance from some of our homes to the source of water is another difficult task. This made some persons to look for alternative means of fetching for the family like, using vehicles, motorcycles, but, what of families who have no alternative regarding to their state of poverty. Can't they die of thirst and other needs for water? Father; Over to Messodoniah and Help us.

We are one of the youngest among the growing churches within the location. Therefore, we consider it as part of spreading the gospel because, our Lord Jesus Christ spreaded the gospel in Samariah starting by asking the Samaritan woman to give him water (John 4:3-8). Again some persons may be refused to fetch from individual source of water but church of God will not refuse them because we stand for love and mercy.

Father; we have made a reasonable and reliable plans to protect and secure this valuable project if it is granted unto us. For example; we have nine committee member here present as the project demands. Secondly, we

have assigned very remedial functions to each of us for the control of Borehole project. Such functions/functionaries are:

Project committee Chairman, project manager, assistant project and security, project adviser and director, project assistant security and watch man, project praying prayer (PPP), Water borehole project key holder and sanitarian officer. On the back of our letter is the attachment of their list fully manifested.

Finally, father, we are struggling for this project because, it will reduce the challenges of water scarcity in our area of location. If it is done for example; people will get to the source of water in time, fetch in time, cook in time, bath in time and go to their offices of work in time. Guinea worm, thread worm and hook worm will go away because the use of good water will eradicate them.

Thanks father.

On behalf of the pool of Living water prophetic mission.

Rev. Fr. Dr. Peter Okworeze Omogo.

Sir

LETTER OF REMINDER

We the entire members of Maranatha Methodist Church, New Jerusalem Section in Amoffia community sincerely wish to remind you for the early opportunity missed for the earlier borehole you approved in the year 2019, and you promised to approve it again.

Since then, the issue and problem of the scarcity of water during the church service and after has been one of the basic problems as many of the church members adult and children rapidly has been affected by different kinds of water-borne diseases such as Guinea Worm, Cholera, Diarrhea, and other bacterial infections.

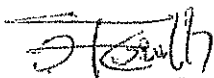

We therefore, solicit for you to use your Samuel Omogo's family to rescue us from this situation.

Finally, we promise to give appropriate guide and protection to ensure the lasting of the proposed borehole.

May God Almighty bless the entire family of Samuel Omogo's Foundation for meeting people's demand always.

Looking forward to hearing from you.

20th January, 2022

Samuel Omogo Foundation (SOF)

Do Rev. Father Dr. Peter Okwoeze Omogo

Sir,

APPLICATION FOR BOREHOLE DRILLING

We the entire member of Ndiagu Ogwudu Ndiulo village Ngbo sincerely wish to apply for Borehole drilling in our village area.

However, Ndiagu Ogwudu Ndiulo Village from the history is purely known village in Umuezeaka Ngbo mostly crops and livestock farmers out obviously in their historical background one of the major problem obstructing the growth of the village is the long lasting scarcity of water and consumption of the available unclean and unacceptable pond has been the only source of water in history of Ndiagu Ogwudu Ndiulo village which is situated at about 20kms away from the village.

This constraint has caused every serious have to teeming people for years which includes as below.

1. Water bone diseases and other related bacterial infections such as Guinea worm, Cholera, Diarrhea.
2. Child mortality and material death as been increasing personality as the result of consumption of unclean Okpuru Ogwurube.

Therefore the propose borehole will benefit us as lot by providing lasting solution to our long lasting problem of water scarcity in Ndiagu-Ogwudu Ndiulo village.

We promise to give all the necessary hygiene, maintenance and protect the proposed borehole.

May God bless Samuel Omogo Foundation and entire family for their good works so far in Jesus name Amen.

Dear Father,

AN APPLICATION FOR WATER WELL

The entire people of Alioma Village in Igbedu Ukwagba Ngbo, wish to apply for the request of water well due to bad and scarcity of water in the entire village and beyond which caused frequently water diseases among the people such as diarrhea, typhoid etc.

In respect to financially stability, the village has not enough capital to dig water well such as borehole to help eradicate the frequency of the above mentioned disease caused by bad water in the village. Also the water distance is up to two kilometers and if found, it is always dirt and unhealthy. We therefore solicit for digging of water well in the village by you.

The entire village people promised to abide by the rules and regulations that will be given to them and as well be grateful that our request will be granted successfully.

**APPLICATION FOR INSTALLATION OF PIPE BOREHOLE WATER AT
HEAVENLY FAMILY GOSPEL CHURCH, LOCATED AT NDEGU IGWE OKPORORO
EKWASHI NGBO, OHAUKWU L.G.A. Reg. No: CAC/IT/NO 54731**

The church members of the above mentioned church hereby wish to apply for the installation of pipe borehole water at the church premises located at Ndegwu Igwe Okpororo Ekwashi Ngbo.

We are always in a state of agony for lack of good drinking water within the environs. The deplorable state of ponds and streams which we drink causes great havoc to the health conditions of both the members and others within the vicinity as many are infected with guinea worm disease, cholera, typhoid fever, etc. because of contaminated streams and ponds by nomads, mad people, lunatics, animals etc.

Also, much are spent by members (Both Adult and children) who travels long distance in search of a better source of water which sometimes end in futility.

We therefore, solicit your foundation to consider our plight as to giving us a positive consideration as it will help to alleviate our sufferings and prosper the Gospel work as were the case of other churches your foundation have remembered.

Attached here included: the certificate of incorporation, photographs of deplorable state of our streams, church members etc.

Under Samuel Omogo Foundation

**APPLICATION FOR DRILLING/ INSTALLATION OF BOREHOLE
WATER IN OUR VILLAGE**

Sir, "Omeru Oha" we the entire people of the above mentioned village under the leadership of Idenyi Edwin Ede want to appreciate your endless effort since many years ago till now, doctor you sustained hope and life for many, thousands of people would have died because of the scarcity of water but we thank Almighty God who used you to rescue many people.

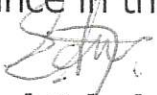

Through out our locality, state and Nigeria in general there is no village that you have not drilled borehole, there is nothing we can say or do than to pray that God will continue to bless, guide, protect and uplift you more in Jesus name, Amen.

Because of bad water in our village many have been suffering from many diseases, because we share or drink the same water with wild animals, birth of different kinds which results to many sickness or water bore diseases.

In order to avoid all this diseases and scarcity of water, seeing the good hand work of God through you since years past, our village decided to apply for one which we strongly know and believe that by the grace of God almighty we must have it this time because we believe it is our own turn because God cannot left us untreated as others are been treated.

To God be the glory that through you God Almighty has chosen to save our people from water scarcity.

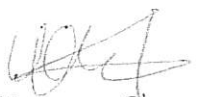

May God Almighty the father of all continue His blessings and guidance in the name of the father, the son and the Holy Spirit.

18th January, 2022

Rev. Father Peter Okwoeze Omogo,
The Founding Father/Executive Director,
Samuel Omogo Foundation (SOF)
Sir,

**APPLICATION FOR INSTALLATION OF WATER WELL
(BOREHOLE) WATER IN NDIAGU ONUOGWU VILLAGE**

We are from the above village requesting for a water well (borehole) due to the problem of water supply we are experiencing so far. We hereby request for borehole because there is need for urgent intervention of a borehole.

Your foundation, Samuel Omogo Foundation has really impacted positively to the life of our people in Ebonyi State and Nigeria in general. Provision of over 400 water well (borehole) has really changed the history of our lives. Some of us suffered from Guinea worm which chairman of the village is example. There are other diseases associated with water scarcity which our people suffers regularly including Cholera, Diarrhea, Tofoid fever etc. since your intervention in provision of water well (borehole) to our people, all these diseases were reduced drastically.

Your foundation has provided some financial assistance to the less privileged people in our society and payment of some students' school fees. Your Foundation also provided means of Transportation to the handicaps and others.

In all these and other positive things you are doing to our people, we say thank you and more power to you elbow.

However, we have been facing with the challenges and difficulties associating with scarcity of water supply. Contamination of water borne disease such as cholera, diarrhea and other related disease has been so rampant. Similarly, raping, stealing, fighting and other rascal behavior is been the problem and it is affecting us negatively as result of scarcity of water supply.

Distance is one of the challenges; it takes about forty (40) kilometer before we get to stream where the whole community gets its water source.

We would be very grateful if our application is duly considered.

Thanks in anticipation.

Sir,

**APPLICATION FOR INSTALLATION OF PIPE BOREHOLE WATER
AT THE ABOVE ADDRESS**

We would like to use this medium to thank you for all the good things that God is using you to do in the life of people in our society. May God bless you and keep you in Jesus name Amen.

We would also like to use this medium to appeal for your help on behalf of the above mentioned church on the subject matter.

The water we drink and use for domestic purposes is very bad, Guinea worm, cholera, typhoid fever etc are on the move in the village where the church is situated and they are seriously affecting every body. People excrete in the streams wash in them and also drink the same water alongside nomadic animals. The water has been so polluted and very soon people will be dying.

The church members and the neighbouring citizens within the areas travel far distance spending much money all in a bid to fetch drinkable water which sometimes proves abortive.

So we really need your helping hands through your Foundation Samuel Omogo Foundation(SOF) donation to install in our church at Ndiagu Atukpa village in Otokoro in Umuogudu Akpu Ngbo, a pipe borehole water to enable us overcome some water borne diseases.

We hereby solicit your Foundation to consider our appeal as to giving our appeal a favourable consideration.

We attach the photograph of the deplorable state of our pounds and streams that we drink.

Thanks,

Sir/Father,

APPLICATION FOR DRILLING OF BORE HOLE

With great honour and respect, I wish to thank God first for the great manifestation of Rev. Fr. Dr. Samuel Omogo Foundation which has given hope and jubilation to very many villages, communities and states in Nigeria and Diaspora.

Indeed you are one of God's Generals in our own generation.

Sir, I also wish to use this opportunity to request for a borehole under your kind office. It is quite absurd that Ogbuite River which is one of the only major sources of drinking water is still the same source by which the villagers' takes their bath and wash their cloths etc.

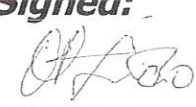

This is to bring to an end the lingering crises of water scarcity/the perpetual suffering of the people of Ogbirigba village in Amoffia Ngbo are passing through.

I earnestly pray and wish that my request will be given an urgent and favourable attention.

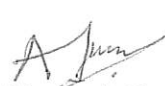

Thanks and remain ever blessed.

The CEO,
Samuel Omogo Foundation (SOF)

Sir,

NEED FOR BOREHOLE IN NDIAGU ONU VILLAGE IN AMOFFIA NGBO

We sincerely apply for borehole drill in our village to enable the inhabitant have access to drinking water.

Ndiagu onu as a new village is facing challenges of water scarcity and is only using "Pond" and streams as sources of water. The said water which is only available during the rainy seasons poses health challenges to the timing house holds.

The location of the streams are very far and water not good for drinking and other domestic uses – hence this is the main reason for this request.

We will appreciate it most if our request is granted success and promise to keep yard over the water to serve the purpose.

Thanks and remain blessed.

AGBABA VILLAGE AMAEFFIA
AUTONOMOUS COMMUNITY
OHAIKWU L.G.A, EBONYI STATE
NIGERIA.
20TH JANUARY, 2022.

The Director,
Samuel Omogo Foundation
C/O Rev. father Dr. Peter Okworeze Omogo.

Sir,

APPLICATION FOR BOREHOLE DRILLING IN OUR VILLAGE PLAYGROUND.

We the entire people of Agbaba Amaefia Okposhi Ngbo, wish to apply for bore hole drilling in our village playground to question the problem of the scarcity and consumption of unclean water from the origin of Agbaba village.

Brief biography of Agbaba village is one of the oldest and first village map pout from the old Okposhi Eheku community with estimated population of about 5000 people, practice of agriculture is their only source of income for living Agbaba village is bounded with Alioma village promise land Otuokpetye and Inyimagu as well.

In the history of Agbaba village one of the problems upsetting their growth is the scarcity of water and also the use of the unclean local water pond in the village called Ogwurube unclean pond for both drinking and domestic uses however, the most contaminating part of this situation is the common and general consumption of the pond by both human being, birds and animals and this has led to the untimely death of young person's yearly as the result of the outbreak of the different kinds of water borne disease a cum bacterial infection such as lacer fever, cholera, guinea and fungi and off recent the increase in death rate became uncontrolled as both the youth, children, and adult fetch water from the same unclean pond.

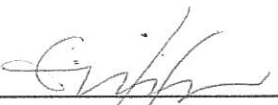

Sir, Use your Godsend charitable foundation to run to our aid to rescue us from this long lasted problem that has mostly contributed to undeserved stiffening of the youths, school children aged, special persons and pregnant women as the even available Ogwurube unclean pond is situated at about 30kms away from the village and always overcrowded and has equally led to the dispute of different kinds as the result or struggling to fetch water per turn.

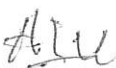

May God almighty bless the Samuel Omogos foundation and their entirely family and also every other hands that contributed to this development strive in Jesus Name Amen.

Thanks for your kind consideration.

Sir,

APPLICATION FOR THE DRILLING OF ULTRA-MODERN BOREHOLE.

We the entire residents of Ndiagu Unah Village in Amoffia Autonomous Community are hereby requesting for the drilling of ultra-modern borehole for use by the inhabitants of our village.

Notwithstanding, the inavailability and scarcity of water especially in dry season is a worrisome to the entire residents of the aforementioned village.

Reasons for the request of the borehole, the request of the borehole is very imperative in the sense that villagers trekked about fifty five kilometers away before they could get where they would fetch water for drinking. Atimes, they succeeded in getting bad water despite all the difficulties encountered. Another reason is that most of the residents usually suffer different kinds of diseases such as guinea worm, cholera, dysentery and diarrhea and this diseases was attributed to lack of drinking good water.

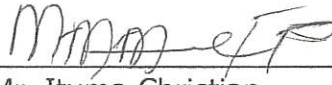

Hence, the entire village are through the medium pleading with you to use your good office to approve our request.

Finally, we also wish to acknowledge and solicit your philanthropism and generosity exhibited in various Communities in Ebonyi State and Nigeria at large.

If our application is favourably considered we shall be very exhilarated and ecstasy.

OUR REF

YOUR

DATE: 15/01/2022

THE DIRECTOR,
SAMUEL OMOGO FOUNDATION (SOF)
C/O REV-FR, DR. PETER OMOGO.

Sir,

APPLICATION FOR INSTALLATION OF PIPE BORE-HOLE WATER AT NDIAGU ALI OKEME VILLAGE ALONG AGU-ACHI SECONDARY SCHOOL UKWAGBA NGBO.

We the member's of Ndiagu Ali Okeme village happily agreed to request for installation of pipe bore hole water at any place where water is discovered within the area of Ndiagu Ali Okeme in Ukwagba Ngbo Ohaukwu L.G.A of Ebonyi State.

The village had been in a problems of water for years ago, even the neighboring village suffers the same to the extent that the pond located within the boundary of the neighboring village was not enough and sometimes it cause problem between the two villages.

The pond was also bad water which causes different disease such as guinea worm, Cholera, Typhoid and other water bore disease.

The following are problems which the people living within the area suffers:

- (a) To get water member's of the village travels kilometers away in other to fetch water.
- (b) During dry season students and pupil go to school very late due to means of getting water.
- (c) The members of the village dose not enjoy good health due to their drink a contaminated, pond and stream water that injected by wide animal, mad people, and Nomadic etc.

With the following reasons we the members of the village organize our self to request for installation of pipe bore hole water in our village. We solicit that through the Samuel Omogo foundation that our request will be granted.

We attach the photographs that indicate the nature of our pond and streams also the photo that covers the nine persons who formed the executives members of the village.

Thanks.

Father,

APPLICATION FOR DRILLING OF BORE-HOLE

We the entire people of the above address humbly apply for drilling of bore-hole. In the first instance we sincerely appreciate you for your kind gesture, mostly as it affects drilling of bore-holes and your other humanitarian services you render to man-kind.

Now we want to remind you that this is our fourth year of sizeless quest for borehole, that is from 2019 – 2022. Reasons being that we are in utter surferness as a result of water scarcity.

Our people travel about 2 to 3 miles before getting in touch with local pond water as you can see in the picture attached. And this has raised a lot of dust in our families as our people suffer different kinds of illnesses.

We cannot do anything to stop this, than to come to you for rescue, and we strongly believe God that our problem is solved through you father.

In view of the above we will be very grateful for your favourable consideration and approval.

Yours faithfully

Sir,

APPLICATION FOR THE PROVISION OF BOREHOLE

We the Ishiagu villagers humbly apply for the provision of borehole in our village. This is because we have experienced untold hardship due to scarcity of drinkable water.

The only source of water is the Ogbokovo stream which last only for 3 months from December to January every year. As a result of scarcity of water in our settlement, we have suffered various waterborne diseases such as guinea worm, cholera, diarrhea to mention but a few.

To this end, we have come for your assistance to enable us join millions of people in drinking good water. We will ensure that the borehole if provided will be well secured and the surrounding kept clean at all time.

Thanks very sincerely our own dearest brother.

Ngbo.

Sir,

APPLICATION FOR INSTALLATION OF WATER BOREHOLE

We the entire village of Ugbamba in Okposhi Eshi Ngbo humbly wish to apply for a water well (Borehole) from the Samuel Omogo's Foundation to enable our village a good drinking water.

This request for borehole is made on the strength of the following reasons:

1. Our people trick between 5 to 10km daily in search of water.
2. our people suffer different dangerous diseases as a result of water borne diseases.
3. Many members of our villages have been seriously attacked by unknown peoples in search of good drinking water.
4. Our children normally go to school late owing to lack of good water to cook and baths.
5. A lot of villagers were involved in fight or struggle for good water, which had caused several injuries and harm.
6. So many peoples dies every months and yearly as a result of infectious diseases contacted through drinking of bad water, while some suffer dangerous sickness like Guinea worm, ring worm and Typhoid fever and others etc.
7. Above all, our people fetch from dirty ponds and streams, which are not good for human health.

Please sir, we wish to appeal to your foundation to give us good drinking water to help our suffering people and stop the future occurrence of some diseases being contracted from drinking bad and contaminated water.

OHAIKWU LOCAL GOVERNMENT AREA

EBONYI STATE

Our Ref: Your Ref: Date:

The Director Samuel Omogo's Foundation (S.O.F)

Rev. Father, Dr. Peter Okwoeze Omogo

Ohaukwu Local Govt. Area

Ebonyi State.

Sir,

AN APPLICATION FOR THE REQUEST OF A BOREHOLE

We wish to apply for the provision of a borehole in our community at Alisakor Village in Okposhi Eheku Ngbo.

The aim is to alleviate our problems on the scarcity of water in our village which include:

1. Tracking of 15 kilometres to Inyimagu, Ameffia, Ngbo dam to mention but a few.
2. Lateness to work, and tiredness after tracking.
3. Meeting some wild animals and snakes etc on our ways.
4. Lastly to avoid some water diseases like diarrhea, Guinea worm, River Blindness and other water born disease.

Caring for the borehole.

The villagers will set up a committee who will be taking care of the borehole so that children and any other people will not destroy it, and to keep the surroundings clean.

So on this note mentioned above and others, we, the entire people of Alisakor village humbly apply for a borehole.

Thanks, and may God continue to bless you in Jesus name.

The Director,
Samuel Omogo Foundation (SOF),
Through;
Rev. Fr. Dr. Samuel Peter Okwoeze Omogo
Father,

APPLICATION FOR DRILLING OF BOREHOLE

We the entire people of Obegu village Igweledeoha in Okposhi Eshi Ngbo Ohaukwu L.G.A of Ebonyi State Nigeria humbly wish to apply for drilling of borehole in our village. This will help reduce the daily suffering imposed on our people as a result of water scarcity.

The only source of water in the entire village is pond water known as Ogwu-Ogbirigba which is not safe for drinking and for domestic use. Besides that, for one to access the pond, it will take such person up to 1½ km.

During dry season, it makes the children go to school late because of water scarcity and sometimes makes our people to have sleepless night.

As a result of these, we the Obegu people decided to solicit your foundation (SOF) to come to our aid to cushion the effects of water scarcity in our area.

We shall ensure the safety and regular maintenance of the borehole if given to us.

Thanks for the anticipated corporation.

13th January, 2022.

The Director
C/O Rev. Fr. Peter Omogo
Samuel Omogo's Foundation
Ebonyi State.

Rev. Father,

AN APPLICATION FOR BOREHOLE

We the entire Ogbuegu Village Amoffia Ngbo, humbly apply for borehole water from you Samuel Omogo Foundation, to help us to reduce the incidence of good drinking water scarcity and its consequence for example.

Our people have to travel distance up to 20km before they could fetch water.

The water if gotten is always dirty to the extent that we use alum in order to make it clean before use.

Our people suffer from diseases as a result of bad water such as cholera, Guinea worm, Diarrhea and Dysentery.

Our people quarrel, fight which causes hatred and cause delay in domestic, school, church late as a result of scarcity of water supply.

Based on the above and more request for borehole water to assist us and reduce our hardship of scarcity of water supply.

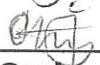

Yours faithfully,

Mr. Eze David O.

Rev. Father,

REQUEST FOR PROVISION OF BOREHOLE AT NDIAGU NWEGBU UMUORU

We the inhabitants of Ndiagu Nwegbu Umuoru in Amechi Autonomous Community humbly request your approval for the provision of Borehole at Ndiagu Nwegbu, a village in Umuoru.

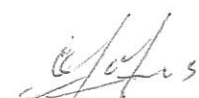

The request is necessitated by the following reasons.

1. There is no existing borehole in Ndiagu Nwegbu.
2. We trek more than 45 minutes to fetch water form Emeronu pond.
3. The Emeronu pond is located across Ezzangbo Effium road from Ndiagu Nwegbu and this exposes our children and women to the risk of road accident, it equally causes the children either not to go to school or be very late to school.
4. Water borne diseases are prevalent in Ndiagu Umuoru because of non-availability of portable source of water.

In the light of the above, we humbly request that you come to our aid by providing bore hole in the said helmet.

We promise to take care and maintain the facility when provided.
Thanks a lot for your kind approval of this our request.

Under Rev. Fr. Dr. Peter Omogo

APPLICATION FOR THE REQUEST OF BOREHOLE WATER

We, the entire members of the above address/village in Ndiagu Onwe Ishiali Nkpagba Umuogudu Akpu Ngbo, most humbly wish to apply for the drilling of borehole water from your foundation.

We are a group of village who has been suffering from water issues like bad stream which affects so many people which normally cause malaria, Guinea Worm, etc. human and animals feed from the same source. As a result, most of the people travel very far in search of good water for our domestic use.

Another problem is that about four (4) villages has been vacated from their various villages due to the crisis/fighting that has been going on in between Benue State and Ngbo people; and those villages that has been vacated include Ndi-Ogberegba village, Makp Isi-Agu Village, Okwereke village, Ndiagu-Ugura Village. These four (4) villages are suffering together with Ndiagu Onwe Ishiali Nkpagba village. As a result, we find water difficult both human and our livestock.

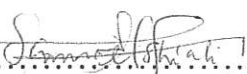

We therefore, beg you to come to our rescue through your God-sent foundation by drilling of borehole water for us since we cannot do it on our own.

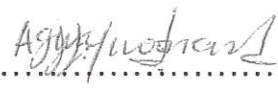

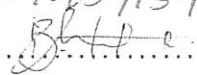

We pray that the Good Lord should continue to protect and grant you and your family all your heart desires as you consider our request favorable.

Thanks

Yours faithfully;

LETTER OF REQUEST

We humbly beg to apply for borehole because we do not have a drinking water

In our community Ndiagu Eshi okposhi ojiegbe eheku, we don't have clean drinking.

Water except local well and dam .for that reason we apply for the first time and second time which is a year 2020and 2021 and it was not approved unto us.

This time, we will be very grateful if our request is granted.

Sir,

**AN APPLICATION FOR INSTALLATION OF
WATER BOREHOLE**

The above mentioned village is requesting for a water borehole from your foundation due to the regular scarcity of water and other problems associated with the water in the village.

The scarcity of water is one of the major challenges facing the village during the dry seasons for long time. The contamination of water borne diseases such as cholera, diarrhea, dysentery, amoebiasis etc is a daily threat to the village, since the village people and the animals drink and use the same water source.

These are other rascal behaviours such as fighting, quarreling etc which associated to the negative life of the village.

The people trek long distance of about 40-50 kilometers before they could get to the water source or pond, hence this request.

Thanks for your anticipated cooperation as we look forward to receive the positive information from you.

APPLICATION FOR INSTALLATION OF PIPE BOREHOLE WATER

We are from the above mentioned village requesting for a borehole due to the problem of water supply we are experiencing so far. We hereby requesting for borehole because there is need for urgent intervention of a borehole.

However, we have been facing with challenges and difficulties associating with scarcity of water supply. Because of the types of water we are having, we are been contaminated with different types of water borne diseases such as cholera, diarrhea and other related diseases. Similarly this issue of scarcity of water supply has created a lot of problems in our village.

Distance is also one of the challenges, it takes about forty five (45) kilometer before we get to the stream or nearby community with good drinking water (Ekweburu Village in Umuoboike).

Father we will be very happy and grateful if our application is duly considered.

Thanks in anticipation.

Sir,

APPLICATION FOR A BOREHOLE PROVISION:

We humbly apply for provision of a borehole to aid the problem of scarcity of water in our area of location. We ask you to permit us to partake or benefit in this Divine Grace of water provision, in which God is using you to do in Ebonyi State and beyond.

Father, we are facing a lot of challenges resulting from lack of a good drinking water. For example, some of water borne diseases such as Typhoid Fever, Dystery, Cholera/Diarrhea and other diseases vectors which have left some lives miserable. Check from Nwafia Ndiagu Upianu Junction to the Catholic Church at Ukpeshi there is not even one borehole which is about 6 kilometres.

Such a distance from our homes to the source of water is so cumbersome, a very difficult task. This has made some persons to look for alternative means of fetching for the family like, using vehicles, motorcycles, but, what of families who have no alternative regarding to their level of poverty. We are in dire of your help please.

Father; we have made adequate and reliable plans to protect and secure this valuable project if it is granted unto us. For example; we have nine committee member here present as the project demands. Secondly, we have assigned very remedial functions to each of us for the control of Borehole project. Such functions/functionaries are: Project committee Chairman, project manager, assistant project and security, project adviser and director, project assistant security and watch man, project praying prayer (PPP), Water borehole project key holder and sanitarian officer.

Behind this letter is the attachment of their list fully manifested.

Finally, we are requesting for this project since, it will reduce the challenges of water scarcity in our area of location.

Father, thanks in anticipation that our request shall be granted to glory of God.

Sir,

AN APPLICATION FOR BOREHOLE

We wish to apply for drilling of borehole in our community.

We were less privileged people of the above named village.

Our children travel up to 6km every day to fetch water for their domestic uses.

Moreso, the elderly parents stays up to one week before taking their bath and washing their clothes.

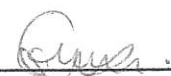

In addition, many parents have no opportunity to get drinking water since the available water is pound.

We pray that our request will be given fully consideration.

Your Ref:

Date: 13th January, 2022

The Rev. Dr. Peter Okwoeze Omogo
The Director Samuel Omogo's Foundation S.O.F.
Ohaukwu L.G.A
Ebonyi State
Sir,

AN APPLICATION FOR THE REQUEST OF A BOREHOLE

We wish to apply for the provision of borehole in our village Azunwangele Village in Ngbo Okpoto in Ndieze 1 Okpoto in Ishielu Local Government Area.

The aim is to alleviate our problem on scarcity of water in our village Azunwangele Ngbo Okpoto which includes:-

1. Tracking of 10.12 kilometres to Ishi Ogba Pond.
2. Lateness to work and school, by the School Children.
3. Sleepless night in order fetch water from the pond due the farness and sometimes dryness.
4. Meeting some dangerous wild animals and snakes on way to the pond.
5. To avoid some water diseases such as diarrhea, guineaworm, river blindness and other water born diseases.
6. Lastly since the crises between Ezza and Ezillo started in the year 2008, we find it difficult to track to Ebonyi river which we have been fetching before, due to fear of being killed or kidnapped by unknown people.

CARING FOR THE BOREHOLE:

The villagers will set up a committee who will be taking care of the borehole so that children and any other people will not destroy it and to keep the surrounding clean.

So on the note mentioned above and others we the entire people of Azunwangele humbly apply for a borehole.

Sir, during the Commissioning of our borehole you promised to give us another one because of the population in our Village and to avoid Over clustering of people in already drilled One.

Thanks and may God continue to bless you in Jesus name Amen.

15th January, 2022.

Rev. Fr. Dr. Peter Okwoeze Omogo
Director/CEO Samuel Omogo
Foundation (SOF)

Dear Sir,

REQUEST FOR A BOREHOLE IN OUR COMMUNITY

With deep sense of honour, respect and glory to God, we the entire people of **Ndiegu Ishiegu village, Isovu, Okposhi Eheku Ngbo** wish to express our profound gratitude to you for your inestimable magnanimity towards mankind, particularly to our good people of Ngbo and Ebonyi-state in general.

Sir, the course you have chosen, to provide portable water for our people, is a noble one because water is life, and whoever makes a safe drinking water available to the people without taking any charge from them, deserves a lot of commendation. So we are highly grateful to you and urge you to keep it up as the Almighty God will surely reward you in Jesus Name.

We the people of the above named village are facing a serious problem of water scarcity particularly in the dry season when it becomes a herculean tasks for our people to get water for ordinary domestic use let alone for drinking. In the rainy season the suffering is less because when it rained we usually get water through the house roof. But when ever it did not rain, we usually walk a long distance of about three to five kilometers to a shallow stream before we can fetch water for our

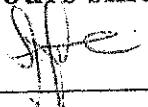

domestic uses. The problem we have with this stream is that it dries up in the dry season and it is the only source of drinking water for humans and animals both for our own village and the nearby ones. As a result, it is usually dirty as many people and sometimes, animals struggle to fetch water from the said stream. Sometimes, it leads to fighting between the children and women in the scramble for water at the stream. There were cases of snake bites for some people who went to the stream too early in the dawn in order to get clean water before the rush.

Worse still is that many of our people still practice open-defecation which helps to contaminate the stream. Consequently, our people suffer a lot of waterborne diseases such as diarrhea, cholera, typhoid fever etc. this is in addition to frequent harassments of our women by militant, herdsmen.

In view of the above stated problems of water facing us, we plead for your help to come to our rescue and drill a borehole for us to alleviate our suffering. We promise to guard the borehole jealously and maintain it constantly to ensure that it will serve us for a long time.

Thank you for granting this request.

APPEAL FOR THE INSTALLATION OF A PIPE BOREHOLE WATER AT OUR CHURCH PREMISES AT NDEGU AZUEGWO UMUEGARA IZHIANGBO

OHAIKWU L.G.A Keg. No: CAC/IT/NO 54731

The pastor, Church workers and members of **Heavenly Family Gospel Church** located at Ndegu-azuegwo in Umuegara Izhiangbo Ohaukwu L.G.A wish to appeal for the installation of pipe borehole water at the Premises of our church.

The calamitous condition we see ourselves as a result of bad ponds, streams, unprotected and infected well-waters includes:-

1. Inability to enjoy good health and longevity for our people as we are infected with typhoid-fever, cholera, guinea worm diseases, skin infections etc.
2. The source of living of our people are jeopardized as many cannot meet up with their social, domestic, business, educational and financial expectations all in search of a good drinking water which always proves abortive.
3. Much money are spent for water especially when the church hold programs that will bring all the branch members together.
4. Our people travel kilometers and miles just to end up fetching contaminated ponds and streams that are exposed to animals, mad people, nomads etc. Hence the request for a borehole installation at our church premises as it will help the church and others within the villages to drink good and clean water

We hereby pray your foundation (Samuel Omogo Foundation) to come to our aid by giving our appeal a favorable consideration.

Attached here included: the certificate of incorporation, photographs of deplorable state of our streams, church members etc.

Sir,

APPLICATION FOR BOREHOLE IN MY COMMUNITY

We the entire members of the above mentioned address humbly apply for Borehole in our community to enhance the up keeping of life (Health).

Sir, there is no source of water let alone of good water or pure water in our community and we apply for help.

In fact, to clear the air the only means of water we have are dam, stream which all cause one disease to the other.

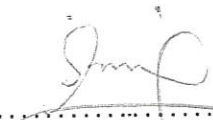

If you lay this help to our community, it will eliminate disease like guinea worm, cholera and source of other communicable disease.

We have witnessed your effort where you have provided Borehole, and other human needs, "more elbow to your power" as you had worked other state of Nigeria particularly in Ebonyi State of (Nigeria) so we need it in our own community.

We thank you for all your effort, may God Almighty give you more strength to continue your good work in Jesus Name, Amen!

Thanks.

APPLICATION FOR DRILLING BOREHOLE

We mostly humbly wish to notify you that the good people of Ndulo Emezabi Amaeku in Ohaukwu Local Government Area Ebonyi State, are in urgently need of a drill borehole.

Our people are suffering too much in order to get water to drink and to wash our clothes. Our people are going far away from the bush to get the water and the water we are drinking are from the stream; we and the animal are battle to get the water from there. The borehole that is near where we are living the size of the population of the people that taking water from that is about two hundred people both and landlord and tenant some will started from morning to evening without getting water, some will be quarrel, fighting, some will go to the security men, policemen spending they money there because of the battle to get water.

Then, we look left and right and discovered that you're the one that God will use to solve the problem, we are hearing what you are doing all over Nigeria and abroad in general.

Our people use to suffer from malaria, cholera, from the bad water we are taking but since you started this project the story change.

We said may Almighty God bless you and give you everlasting life.

We shall be very grateful if this humble request is given an urgent and positive attention.

Thanks for your co-operation.

Rev. Father,

APPLICATION FOR THE SUPPLY OF BOREHOLE

We, the entire good people of Ndiagu Agbo Etit in Okposhi Nkwolu, humbly wish to apply for the installation of borehole in our village. Reason, we have been suffering scarcity of water for a reasonable number of yours in our community. Our only sources of water supply are;

(1) Stream (2) Pond respectively.

These two sources of water supply have generated a lot of diseases to us such as Cholera, Cough, Guinea worm respectively.

These two sources of water supply available in a year from December to February (3 month).

All our efforts to have borehole from past and present government proved abortive.

Therefore, humbly appeal that you use your good office to rescue us from the ugly situation. We strongly hope that this our application shall duly considered.

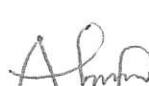

Thanks for your anticipated cooperation.

Yours faithfully,

Sir,

APPLICATION FOR INSTALATION OF WATER BOREHOLE.

We the entire village of Ndiagu Oduma village Okposhi Eshi Ngbo, humbly wish to apply for a water well (Borehole) from the Samule Omogo's foundation to enable our village have a good drinking water.

This request for borehole is made on the strength of the following reasons:

1. Our people suffer different dangerous diseases as a result of water borne diseases.
2. So many of our village members die every months and yearly as a result of infections diseases contacted through drinking bad water.
3. Some suffer dangerous sickness like Typhoid fever, Guinea worm and ring worm etc.
4. Our children normally go to school late owing to lack of good water to cook and baths.
5. Our people trek between 6 to 12km daily in search of water.
6. A lot of villages were involved in fight or struggle for good water, which had caused several injuries and harm.
7. Many members of our villagers have been seriously attacked by unknown people in search of good drinking water.

Above all, our people fetch water from dirty ponds and streams, which are not good for human health.

Please sir, we wish to appeal to your foundation to give us good drinking water to help our suffering people and stop the future occurrence of some diseases being contracted from drinking bad and contaminated water.

The Administrator,
Samuel Omogo Foundation

Dear Sir,

APPLICATION FOR A BORE-HOLE

I write to apply for the favour of having a borehole drilled within the environs of the above school. The need of potable water has for year been the bane of our school.

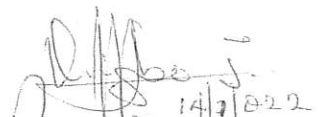

The source of water in the school has been water supply from the Abakaliki Capital City by the use of water tankers.

Therefore we believe and pray that drilling of a borehole will alleviate the water problem the school has been experiencing in the course of years. It will also help to ensure that the students maintain good health.

Thanks for your anticipated concern.

Yours sincerely,

Rev. Fr. Dr. Peter
Okworeze Omogo.

Sir,

APPLICATION FOR BOREHOLE DRILLING

We the entire people of Ndiagu-Ogba Village in Okposhi Ngbo sincerely and humbly wish to apply for a water borehole drilling within our Village playground to solve the problem of scarcity of water that has confronted Ndiagu-Ogba Village from the origin.

LITTLE BIOGRAPH OF NDIAGU-OGBA VILLAGE.

Ndiagu-Ogba Village is one of the well identified Villages originated from the old Okposhi Ehueku Ngbo with estimated population of about 6,000 people. The people of Ndiagu-Ogba Village are mostly local farmers who involved on the production of crops and livestock, as source of income. But, obviously in the history of Ndiagu-Ogba Village one of the basic problems affecting them is the scarcity of water for drinking and home uses. The only available water is contaminated unacceptable and unclean open Ogba water pond commonly shared by both human being and other animals, which is also situated at about 26kms far away from Ndiagu-Ogba Village.

However, this problem of the scarcity of water for years has majorly contributed to the underserved and persistence increase in the death rate yearly. The major contaminants of this water pond are as below:

❖ Premature death among the people of Ndiagu-Ogba Village as the result of the steady outbreak of water born disease such as Guinea worm, diarrhea, tuberculosis, cholera, and other bacteria infection and fungi.

❖ Unwanted suffering among Ndiagu-Ogba Village example the resent outbreak of the covid-19 pandemic has made the situation more difficult as the Villagers struggling to fetch per turn cannot have access to water again due to ccovid-19 spacing protocol

❖ Some of the pregnant woman often uses to have miscarriage and pre-mature delivering due to underserved suffering in search of water and consumption of unclean contaminated Ogba water pond.

❖ School dropout and poor performances among the school children as the result of the serious search of water and the delay to fetch per-turn every morning before leaving to school. Also many Ndiagu-Ogba dwellers has experienced series of injuries as the outcome of this struggle from the origin of Ndiagu-Ogba.

Lastly, we promise to ensure we manage, protect and guide the proposed borehole for it to last very long, in order to promote hygiene and sanitation in our Village.

May God bless the entire Harrington and Samuel Omogo's foundation family for helping the poor and needy.

Attached are the photographical views for your kind consideration.

Sir,

APPLICATION FOR BOREHOLE

We the entire Akpegu village in Amoffia Ngbo, humbly wish to apply for a borehole from you foundation to help reduce the effects of water scarcity and its causes to the people of Akpegu Village.

Moreover, the only water source which is Ogwu Udeeh dam and is not even good for domestic use talk of human consumption. This water source contributes to certain illness like Cholera, Typhoid fever, Guinea worm and many other diseases related from this bad source of water. Sometimes, animals are been reared around this dam and also drink from this same source.

Moreover, Akpegu village seek for your help for the borehole in our village because of our population too is about one thousand three hundred and seventy people (1, 370) and about 267 households. The kilometer of fetching good drinking water is about an one hour, thirty minutes to and fro.

We assure you of our general effort to maintain and secure the borehole adequately to serve the people of Akpegu village, and also to apply the techniques of lubrication and replacement of any damaged part at due time. Also to put a security to monitor the villagers in order to the durability of the borehole for the people.

Thanks for your anticipated consideration.

**APPLICATION FOR THE INCEPTION OF BORE HOLE AT
 OUR COMPREHENSIVE HEALTH CENTER (CHC) NDIAGU EZE
 UMUOGUDU AKPU WARD 1**

Thrs. selected health center have been lacking scarcity of water since 2013 till today. Lack of water hinders the progress of the health Institution in many ways.

The dirty pound called (Nwangbeke) used by the nurses can be found five miles away from the health center. Nurses mandate men to fetch from the pound during delivery, this becomes burden to men. This contaminated pound water may also infect the women and infants during delivery process because they cannot resist disease infection. Lack of water reduces the population attendance to our health Institution. People in the health Institution need water to drink, cook, bath, wash etc for healthy purposes. Water is life of human being, without water people will die.

We the villagers, nurses, health committee members solicit that this application be given due consideration.

Yours obedient servants,

Dear Rev. Father,

APPLICATION FOR ESTABLISHMENT OF BORE-HOLE DRINKING WATER

We the entire members of Divine Light Foundation Church, Ndiagu Upianu Umuogudu Oshia Ngbo wishes to congratulate you for the good work you have been doing to various communities, we pray that the Almighty father will reward you richly in Jesus Name. Amen.

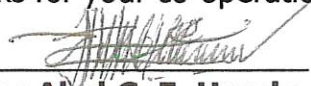

Please, father we equally ask you to favour us by constructing one (1) pipe water bore-hole in our community because our people perish due to lack of good water.

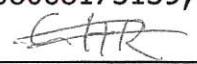

This is to enable the church congregation and the whole community to have accessible opportunity for a good drinking water.

Beside this, there is a high level limitation of water scarcity leading to water crisis, water shortage, water deficit, stress and other challenges. Along the point, the recent review on our common source of water consumption with evidence demonstrated that our water is highly **acidic contaminated water** couple with the poor sanitation which has link for transmission of epidemic diseases within the village such as Cholera, Diarrhoea, Dysentery, Hepatitis, Typhoid, Guinea worm appendicitis and other related diseases within.

We therefore, solicit for your co-operation and philanthropic approval, more especially to enable the church congregation and the whole community to have access to drinkable water.

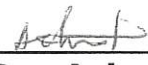

Thanks for your co-operation.

Sir,

APPLICATION FOR BOREHOLE

We the entire members of Orokoto village in Ndulo Umuogudu Akpu Ngbo humbly wish to apply for drilling of borehole in our village to enable us to get good water for the masses.

The need for the drilling of the borehole in our village is on the basis of the following

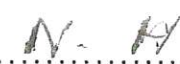

1. So many of our people suffer different kinds of diseases such as Typhoid Fever, Guinea worm, ring worm etc. as a result of the bad water consumption by the member of the village
2. Our children normally go to school late owing to lack of good water for cooking and bathing.
3. Our people trek about 6 to 15km daily in order to get good water for use and at time succeed in getting none as a result of crowd waiting for turns in the same place they went to fetch the water.
4. A lot of villagers were involved in fight or struggle for good water, which had caused search of good drinking water.
5. Many members of our village haven been seriously attacked by unknown people in search of good drinking water

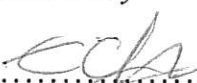

Please sir, we wish to appeal to your foundation to give us good drinking water to help our suffering people and stop the future occurrence of some diseases contracted from drinking bad and contaminated water.

Sir,

**A REQUEST FOR THE DRILLING OF BORE-HOLE WATER
WELL IN OUR VILLAGE**

We the members of Azuokpuru village, Umuezeaka Ngbo hereby this letter request for the drilling of a bore-hole water well in our village.

For past years, we have been languishing in lack of a good water pump for drinking and doing other domestic activities. We can as of now get our drinking water and domestic activities water from stream, pound and rain water during rainy seasons by trekking to a long distance from our village in search of water. The bore-hole water will help to reduce the hardship/challenges we pass through due to lack of good water. It will also act as a protective measure against cholera and guinea worm diseases that attack us and also improve our state of good health.

We promise to constitute some agents and committee which will help in maintaining and taking good care of the bore-hole so that it will last for a long time (stay the test of time).

Remain blessed as you give this request a favourable attention and consideration.

Rev. Father,

APPLICATION FOR INSTALLATION OF PIPE BOREHOLE WATER

We are from the above village requesting for a borehole due to the problem of water supply, we are experiencing so far. We hereby requesting for borehole because there is need for urgent intervention of a borehole.

However, we have been facing with the challenges and difficulties associating with scarcity of water supply. Contamination of water borne diseases such as cholera, diarrhea and other related disease has been so rampant. Similarly raping, stealing, fighting and other rascal behavior is been the problem and it is affecting us negatively as result of scarcity of water supply.

Distance is one of the challenges; it takes about forty (40) kilometer before we get to stream where the whole community gets its water source.

We would be very grateful if our application is duly considered.
Thanks in anticipation.

Beloved Rev. Priest,

APPLICATION FOR YOUR ASSISTANCE IN SINKING BOREHOLE

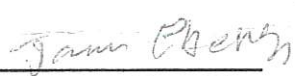

We the members of the committee representing the above village wish to request for your assistance in sinking borehole in any part of the village that water can easily be accessed.

This particular village travels many miles to get washing and drinking water every day or season of the year. The only spring water situated at a personal swampy land stands as the only source of water supply, which takes care of over 500 a habitants that each time wait for the whole day, only to draw water from the slowly spring water called Iyi Akpu.

This particular complaint has been laid to series of governments that come and go, without any positive result. Based on this, we then appeal to you to use your good offices in looking to our plight, with a view to granting our petition, to enable us benefit from your magnanimity; just like other numerous villages.

To prove our claim, kindly see the struggle of our women in a bit to get water in each occasion on the enclosed photograph.

13th January 2022

140

The Director,
Samuel Omogo
Foundation (S.O.F)
C/O Rev. Fr. Doctor
Okwo Eze Omogo

Father,

APPLICATION FOR SINKING WATER BOREHOLE.

We the entire inhabitants of the above addressed village do hereby apply for water borehole in our village.

This is because we are suffering for lack of good drinking water especially during the dry season as from November to the month of May. Both women and children spend over night in order to get water from spring not only that, streams dry's off immediately is dry season.

We share with animals in common use of stream, and shallow pond water for drinking thereby transfer some water borne diseases to human beings such as cholera, diarea e.t.c

As a matter of fact, we believe it is salvation that has reached the entire Ebonyians to reduce the suffering from drinking impure water.

Indeed we lack words with which to address your episodic record of established water boreholes in Ebonyi state and beyond.

Had it been it were in the authority of a politician approved project, the less privileged citizens would have not benefitted it.

Once more we are happy to testify for your humanitarian concern for such is the word of our lord Jesus Christ as recorded in the gospel of St. Matthew 25 vs 5 "for I was hungry and you gave food, I was thirsty and you gave drink, I was a stranger and you took me" The benefits and blessings must follow your charity work.

Bravo Rev. FR. Doctor Okwo Eze Omogo
(Omereooha 1 of shepherd of God)

We enclose here with the pictures for evidence of such ugly conditions.
Thanks.

Ebonyi State.

Sir,

AN APPLICATION FOR BOREHOLE

We the entire Ndiagu Eze Village Umuogudu Oshia Ngbo, humbly apply for borehole water from you Samuel Omogo Foundation, to help us to alleviate the incidence of lack of drinking water scarcity and its consequence for example.

Our people have to travel distance up to 5 kilometres that is from Ndiagu Upianu to Ndiagu Ogba before they could fetch water.

The water if gotten is always dirty to the extent that we use alum in order to make it clean before use.

Our people suffer from diseases such as cholera, Guinea worm, Diarrhea and Dysentery a result of impure water. Also people quarrel, fight which causes hatred and cause delay in domestic, school, church late as a result of scarcity of water supply.

Based on the above and more request for borehole water to assist us and reduce our hardship of scarcity of water supply.

Sir,

APPLICATION FOR A STANDARD WATER WELL

We, the entire people of Obodo Agba, Ndiagu –Udu village from the above address wish to apply for the provision of a standard water well from Samuel Omogo Foundation through our father- Rev. Father Peter Omogo.

Since ages, the people have suffered untold hardship because of bad sources of water. The only source of water supply is through available pond and rain water sometimes. This has caused the chronic attack of various diseases which include Guinea worm, Typhoid, cholera etc. Snake bites and other hazards are highly experienced within the village dwellers.

Distance on how to get to the water causes going to other household foundations such as late to school and work as well.

We shall be very grateful if our plight is positively considered.

May the Almighty God empower you more and more as you work in his vineyard for the down-throden.

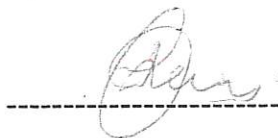

Thanks.

Sir,

APPLICATION FOR A HAND PUMP BOREHOLE.

The village of Ishiagu Ndiagu Idaka humbly appreciate your endless effort in elevating the sufferings of the less privileged in all areas of life through Samuel Omogo Foundation.

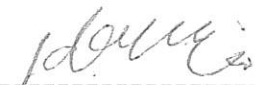

We have heard and seen your effort in service to God and humanity in areas of water supply (borehole) cash donation, bursary award to students, widows and youth empowerment.

Sequel to this, we the village of Ishiagu Ndiagu Idaka Ekwashi humbly write to apply for a hand pump borehole through your Samuel Omogo Foundation. Our source of water supply were far distance stream and ponds which are exposed to domestic and wild animals thereby resulting to water borne diseases out break in the entire community.

Sir, if our request is granted and a borehole is given to us, it will promote our health status, reduce disease outbreak and prolong our life pan because water is life.

Sir, we promise to ensure that it is properly secured and maintained if it is given to us.

Thanks and remain blessed as we look forward to hearing from you.

Sir,

APPLICATION FOR A REQUEST FOR BOREHOLE IN OUR VILLAGE.

We the entire village sincerely appreciate the good Godly work of Rev. Fr. Dr. Peter Omogo and his enviable foundation for providing abundant life for the entire people of Ebonyi State Communities. This is because water is life. People of Ogwe Iyi Village of Okposhi Nkwolu Ngbo hereby wish to apply for a borehole in their village from the foundation. This will greatly alleviate the people from suffering several diseases caused by bad water they drink daily.

It is unbearable to state that only source of water in our village is a pound and moldy stagnant water that is used by both wild animals and human beings. The people have been suffering from Guinea worms, stomach upsets and other water borne diseases.

We are seriously begging that this good work and services of Rev. Fr. Dr. Peter Omogo and his foundations will reach us as it reached others, so that our suffering will stop and his good name will continue propagating more.

Our prayer is that Almighty God will protect and guide him in all his endeavors and increase his foundation larger so that the benefit will reach all and sundry.

May this our humbly request be favourably granted.

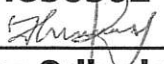

Thank you and God bless.

Dear Sir,

APPLICATION FOR BOREHOLE

We must first of appreciate your wonder works which have become the topic of all days all over Ebonyi State. Sir, it is never like giving you another name but I must describe your nature because you are such loving heart, Amiability and indefatigable, infact you are a strong helping hand in the life of the less privileged ones, a source of water to many communities in Ebonyi, infact through your incomparable works I came to found out what a rare gem is all about and you are one of a kind. Sir I pray may God bless you mightier than ever, Amen.

Therefore, because of good news about you and your doings which have gone viral, we wish to apply for a borehole for our church because it have been a challenge to us that we and animal have been drinking the same water, suing unacceptable water, getting from far distance from the community where our church is located. And because of these challenges people from different areas who comes for God's healing, blessings deliverance that lives in the church have been suffering from different kinds of diseases like skin infection, cholera, typhoid, shigellogis, Amoebisis, Diarrhea and eating pois food by the unacceptable water.

So, sir if you and your Honorable house will grant us our request it will extremely help in eradicating all these diseases that your people is suffering from and God will bless you mightier.

APPLICATION FOR INSTALLATION OF PIPE BOREHOLE WATER

We are from the above village requesting for a water well (borehole) due to the problem of water supply we are experiencing so far. We hereby requesting for borehole because there is need for urgent intervention of a borehole.

However, we have been facing with the challenges and difficulties associating with scarcity of water supply. Contamination of water borne disease such as cholera, diarrhea and other related disease has been so rampant. Similarly raping, stealing, fighting and other rascal behavior is been the problem and it is affecting us negatively as result of scarcity of water supply.

Distance is one of the challenges; it takes about forty (40) kilometer before we get to stream where the whole community gets its water source.

We would be very grateful if our application is duly considered.

Thanks in anticipation

Rev. Father Dr. Peter Omogo
Samuel Omogo Foundation

Dear Father,

APPLICATION FOR BOREHOLE

We the members of Ndu-Onuogba Inyimagu Okposhi Eheku Ngbo, wishes to apply for borehole from your foundation. This request was due to our age longed suffering from lack of good drinking water which is even getting worse now.

The above village populated over two thousand (2,000) people, have no means of good water other than one stream called Onuogba Stream. The worse of it all is that the stream does not last up to January and it dries off.

More so, many water born diseases are associated with the water due to the nature of the environment coupled with the fact that domestic animals trespasses by it. The unsafe challenge of this water issue to a great extent hampered our lively hood and imposes serious threat to our families, affecting the education and health of our children.

We hereby appeal to you, to passionately come for our help and save the situation with the grace God has bestowed over your life. We promise to take good care and wise use of the borehole if we are favourably considered fit to benefit.

Thanks for your kind and usual co-operation.

Our Ref:.....

Your Ref:.....

Date: 20th January, 2022

Samuel Omogo's
Foundation (SOF)
Care of
Rev. Fr. Dr.
Peter Okworeze Omogo.

Sir,

APPLICATION FOR BOREHOLE DRILLING IN OUR VILLAGE SQUARE.

We the entire members and good people of Ndiagu-Okpurukpu Village with utmost honour and sincerity wish to apply for borehole drilling in our Village in order to solve the problem of scarcity of water among the people of Ndiagu-Okpurukpu Village for years.

HISTORICAL BACKGROUND OF NDIAGU OKPURUKPU VILLAGE

Ndiagu Okpurukpu village is one of the most popular village known in Okposhi Ngbo, most of the villagers are peasant farmers and practice of agriculture is their source of living, but one of the most pressing needs among the people of Ndiagu Okpurukpu village is the provision of the clean and acceptable water for both drinking and domestic uses.

Furthermore, the scarcity of water in Ndiagu Okpurukpu has been one of the main problems distracting the progress of our village and has contributed to the high increase in death rate among the villagers. The only available water for both drinking and domestic uses is the unclean Iyi-Akpu, water pond shared by both human being and animals situated at about 25km's away from Ndiagu Okpurukpu village.

This open pond serves as the major contamination point that promote water born disease outbreak such as guinea worm, cholera, diarrhea, tuberculoses and other related bacteria infection led to the death of the many villagers on yearly basis.

Some of the negative effects of this water scarcity in Ngiagu Okpurukpu village are as follows;

- It has contributed to the untimely death among the villagers on yearly basis
- Promotion of disease outbreak in our village
- Discouragement of personal hygiene and sanitation

Unexpected injury on daily basis as the result of the struggle to fetch per turn in the water pit.

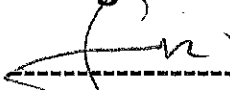

Finally, sir we solicit if you can use your God-gifted Charitable Samuel Omogo's Foundation to arrest this perpetuating problem and bring us back to life as water they says is life.

May God Almighty bless Samuel Omogo's Foundation and every other hands he has been using to rescure the poor and needy in Jesus name, Amen.

Thanks in anticipation looking forward hearing from you.

AN APPLICATION FOR THE REQUEST OF A BOREHOLE

We wish to apply for the provision of a borehole in our village Ndiagu Ogwudu Ukwagba Ngbo.

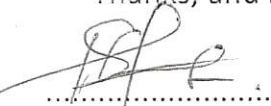

The aim is to alleviate our problems on the scarcity of water in our village which include:

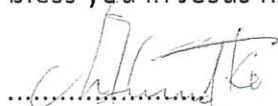

1. Unhealthy struggle to fetch water from Aloma stream, which is 20 kilometers away from our village, this struggle sometimes lead to brutal fight and breaking of water cans.
2. Inability to prepare meal on time and lateness to work.
3. Meeting some wild animals on our ways, example: snake bite.
4. Avoid some water born diseases such as diarrhea, Guinea worm.

We will be very grateful if this application is giving favourable attention. This borehole when drilled will be giving appropriate care to avoid easily damage by children or any other person(s).

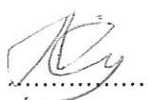

Thanks, and may God continue to bless you in Jesus name.

Yours faithfully,

Ebonyi State.
My Dear Rev Father,

APPLICATION FOR BOREHOLE

We the entire village in Umuogudu akpu community of the above right hand addresses do hereby apply for borehole in our area.

The reasons, our increase in population, increase the shortage of water supply in our village /community as a result of that it causes quarrelling, fighting, sometimes leads to police case while people struggle for water.

Also the ones we have are not safe for both drinking and domestic uses.

It also contaminates many water borne diseases.

Father kindly make use of your good office to help us as you have been helping others.

We hope that our humble application will be given a favorable consideration.

Yours Faithfully

APPLICATION FOR A BOREHOLE IN OUR VILLAGE

Our dear Rev. Fr. Sir, we have seen the numerous good things you have been doing to the people of Nigeria without discrimination. Our prayer is that, the almighty God must continue to bless you and your foundation in Jesus name Amen.

Sir, we the entire household in Ndiagbo village of Okposhi Eshi Community hereby wishes to apply for borehole water in the village. This is because, we have no good drinking water and this has cause a lot of ill health and suffering to our people since ever

Imagine, a village of not less than 36 households and over 200 people (adult and children) with only one spring (Ogwu Akpa) as their source of water supply during dry season. We do go to a nearby village (Igwelede) of about 12 miles to fetch pond which can only be used for domestic works in the home.

Sir, this dirty water has caused a lot of problems like Guinea worm, Diarrhea and dysentery to our people. We promise to take good care of the borehole if it is given to us and God shall be blessing you the more.

Thanks.

AN APPLICATION TO BE GIVEN A BOREHOLE IN AMUZU SOUTH

In regard to the borehole in which our dear son Rev. Dr. Peter Omogo has been given to the entire Ebonyi State.

I therefore apply to be given us since we have not gotten any in our village Amuzu south. The village is highly populated and there is no borehole. Their only source of water is a muddy pond has never last in dry season and it has caused most of our people and animals to die untimely.

In fact, our children also have it very difficult to fetch the pond because is very far from the village and the school children do go to school very late.

Sir, we the entire village will be very glad if this application is being honored with due respect.

Yours faithfully

On behalf of Amuzu South village Oshiegbe Community.

C/O Rev. Fr. Peter Omogo
Father,

REQUEST FOR DRILLING BOREHOLE.

The people of the above address are humbly requesting that you help to alleviate us from the problem of scarcity and total lack of water for drinking and other uses.

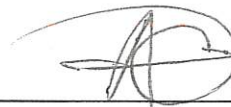

As from the month of Nov. to first week of Dec., our sources of water being stream and pond do dry up to an extent that we find it difficult to get drinking water. In order to get drinking water we do trek a distance of twenty (20) km to Ebonyi River, which is usually contaminated with water borne diseases like "guinea worm". For us to drink it we do boil and filter it.

Father, may you help us and grant our request.

Yours Faithfully,

Mr. Awoke Simon

Sir,

APPLICATION FOR A STANDARD BOREHOLE

We, the entire people of Umuobeye Nidagu-Udu village Umuogudu Oshia wish to apply for the provision of a standard borehole from Samuel Omogo Foundation through our father **Rev. Father Peter Omogo.**

Since many years, the people have suffered severe hardship because of bad source of water. The only source of supply is through available pond and rain water. This has caused the chronic attack of various diseases which include Guinea worm, Cholera etc. snake bites and other hazards are highly experienced within the village dwellers.

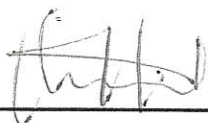

Distance on how to get to water causes going to school late and work as well.

We shall be very grateful of our plight is positively considered.

May the almighty God strengthen you more and more as you work in his vineyard for the down – trodden.

Thanks.

Rev. Father Peter Okwoeze Omogo,
The Founding Father/Executive Director,
Samuel Omogo Foundation (SOF)

Sir,

**APPLICATION FOR INSTALLATION OF WATER WELL (BOREHOLE)
WATER IN NDIAGU ALIOMA VILLAGE OTUEBU NDABURU EBENYI**

We are from the above village requesting for a water well (borehole) due to the problem of water supply we are experiencing so far. We hereby request for borehole because there is need for urgent intervention of a borehole.

Your foundation, Samuel Omogo Foundation has really impacted positively to the life of our people in Ebonyi State and Nigeria in general. Provision of over 400 water well (borehole) has really changed the history of our lives. Some of us suffered from Guinea worm which chairman of the village is example. There are other diseases associated with water scarcity which our people suffers regularly including Cholera, Diarrhea, Tofoid fever etc. since your intervention in provision of water well (borehole) to our people, all these diseases were reduced drastically.

Your foundation has provided some financial assistance to the less privileged people in our society and payment of some students' school fees. Your Foundation also provided means of Transportation to the handicaps and others.

In all these and other positive things you are doing to our people, we say thank you and more power to you elbow.

However, we have been facing with the challenges and difficulties associating with scarcity of water supply. Contamination of water borne disease such as cholera, diarrhea and other related disease has been so rampant. Similarly, raping, stealing, fighting and other rascal behavior is been the problem and it is affecting us negatively as result of scarcity of water supply.

Distance is one of the challenges; it takes about forty (40) kilometer before we get to stream where the whole community gets its water source.

We would be very grateful if our application is duly considered.

Thanks in anticipation.

Dear Sir,

AN APPLICATION FOR CONSTRUCTION OF A BORE-HOLE

The chairman and the entire villagers wish to apply for construction of a bore-hole in the village. We have for years suffering for unsafe drinking water within the village especially during the dry season.

We highly in need of borehole for these reasons:

1. Satisfy our urge for good water.
2. Prevent going far place in search for water.
3. Help people to be earlier to work / school.
4. Prevent water born disease that may attach the villagers.
5. Stop worm that may be contaminated in the stream.
6. Improve the well-being of the villagers.

We hereby enclosed the photograph of villagers fetching unsafe stagnant Uzuru water in the village

We shall be relieved of further suffering if our application is granted.

Thanks.

The chairman,
Samuel Omogo foundation (SOF)
Ohaukwu Local Govt Area
Ebonyi State, Nigeria.

Sir,

**APPLICATION FOR A BOREHOLE TO BE SITED AT ELDER ISAAC
ALAGBA'S COMPOUND**

We the family of Elder Isaac Alagba hereby apply for a borehole due to the perennial difficulties we face in our area/ community because of the water scarcity, in which a lot of time and energy are wasted in search of water

We believe that bringing the borehole nearer to us will end the incessant quarrels, fighting, breaking of water pot and containers and out right enmity occurring daily at the few available sources of water.

Above all we hope that the provision of a good source of water like the borehole will help in eradicating water born diseases such as guinea worm, cholera, typhoid and malaria that is prevalent in our community.

In the light of the foregoing, we hereby apply for the borehole to be sited at Elder Isaac Alagba's compound at Inyimagu, Okposhi Eheku Ngbo in Ohaukwu L.G.A, Ebonyi state.

We seize this opportunity to thank you in anticipation that our application will receive a favourable response. We appreciated and thank you also for the good work you are doing in out time, its said that "water is life" therefore he who gives water, gives life. You have been giving lives to various communities and families across the local governments and the state at large. You are a God sent and a blessing to our generation. May God continue to bless and reward you.

Office of the Samuel Omogo's
Foundation,
Ebonyi State Nig.,

Dear Fr.,

AN APPLICATION FOR BOREHOLE WATER PROJECT

The parish priest, the parish councilors and the entire parishioners of St. Nicodemus parish Amata Akpoha, join in the gratuitous voices of the beneficiaries of the good works of the Samuel Omogo's Foundation express profoundly our gratitude for the numerous contributions of the said Foundation in alleviating the deplorable conditions of the people of this state and beyond. Today a lot of people especially at the rural areas can heave a sigh of relieve due to the humanitarian services of the said Foundation.

However, here in our parish obtaining potable water has not been easy since the inception of the parish. Many a time we join the villagers to struggle for Well water or move to the nearby village Amaogu Akpoha in search of water, whenever the community borehole from which we get our water fails to pump as it often does due to inadequate water and massive use.

So, with regard to the above predicament we humbly solicit the help of the Samuel Omogo's Foundation to come to our help and sink borehole water for the parish use which I believe will benefit the community as well. Our parish will ever be grateful if our application is considered and attended to.

Thanks and remain ever blessed.

Dear Rev. Fr.

**APPLICATION FOR THE PROVISION OF BOREHOLE WATER FOR
OUR COMMUNITY**

We the people of Nduebor in Ebia Unuphu in Amegu community do sincerely solicit for the provision of good drinking water from the Foundation that care so much for the poor and needy.

The only source of water in this area of the village is a pond (Enyim Nduebor) dedicated to a deity and thus, the water is not allowed to be used for every household activities e.g. building of houses. Apart from the pond been located far from the residential homes, which makes people to trek for 10-15kms before it could be accessed; it is not good for drinking and a commonest source of contracting guinea worm and other water associated diseases.

Meanwhile, just last year 2021, a blind young Emmanuel was drowned by the pond when he missed his track while he was going to church.

Thank you for your usual cooperation.

Signed:

Dear Rev. Fr.,

**APPLICATION FOR PROVISION OF PORTABLE (BOREHOLE) WATER
FOR OUR COMMUNITY**

We the people of Ochobuokum Amachi Community humbly appeal for the provision of portable borehole water in our community. We really appreciate you for all the good works you have been doing and we pray God to continue to bless and keep you Amen.

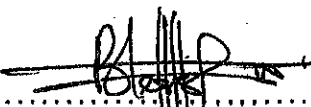

The challenges are listed below:

1. No sources of portable water in our community.
2. Our people trek between 8 – 15km daily in search for portable water.
3. The far distance of the stream/pond available make our children go to school late.
4. The only accessible stream is contaminated and it is not healthy for drinking.
5. Contraction of water borne diseases such as guinea worm, dysentery, diarrhea, typhoid fever and schistosomiasis etc. has been a long lasting problem in my village.

It is based on the above experiences that we hereby humbly appeal to Samuel Omogo Foundation to come to our aid by providing us with portable clean water to save our people from untold hardship they are facing as a result of non-availability of clean and safe water.

Thanks for your usual co-operation.

Signed:
