Father,

APPLICATION FOR BOREHOLE

With regard to your help in Ebonyi State in respect of borehole, we the entire people of Ndiagu Ali Village humble apply for a borehole.

We are very seriously pleading for help from you, to enable us have a nise drinking water.

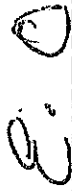

Our Akpoma Stream is very far from the village, which makes us surfer much before getting to it.

Even when we get there, it will be very hard before it reach some ones turn, especially during dry season. So we are pleading for the letter to be considered.

The Almighty father will continue blessing you for your good work
Thank and God bless you as we the entire people of Ndiagu Ali
Patiently wait for your reply.

Ikpo-mkpuama, Umuogudu Oshia Ngbo.

Padre,

APPLICATION FOR DRILLING A BOREHOLE

With due respect and absolute humility to you Father, we acknowledge your philanthropic gestures towards mankind in their various need particularly borehole drilling, mobility, medical treatment, and financial support and so on and so forth.

In view of these your philanthropic gestures, we the people of Alioma Village pray that you extend this gesture to us by drilling a borehole for us because we have suffered a lot due to lack of good drinking water and inadequate supply of water as the attached pictures will show. We are more than 500 (five hundred) persons in the village and use to suffer from many water borne diseases. We therefore solicit that you extend your unalloyed help to us.

May the Almighty God bless you as you consider and grant our humble request. Thanks a bunch in anticipation.

Sir,

AN APPLICATION FOR THE PROVISION OF BOREHOLE IN OUR VILLAGE

I wish to start by congratulating you for your ability to provide bore-holes in different villages, communities and states. More power to your elbow.

The above addressed village wish to appeal to you for the provision of bore-hole in our village. Time may not permit me to narrate all the problems/challenges facing the village as a result of lack of water.

Some of the problems include fighting among women as a result of one same first, diseases like cholera, guinea worm, diarrhea etc are reampart in our village as a result of drinking and cooking with impure water.

All the above problems and more motivated the village to cry for help. We shall be grateful if this application is considered and favourably granted.

Yours faithfully,

Sir,

REQUEST FOR DRILLING OF BOREHOLE

Following the collection of Need Assessment Form for Borehole in Ebonyi State, we hereby apply for drilling of a Borehole in our catholic Parish St. Joseph Parish Agugwu Ekwashi Ngbo North Development centre in Ohaukwu L.G.A of Ebonyi State.

The need for borehole arises due to severe scarcity of both drinking water and other domestic water uses. However, the only temporary source of water is streams that does not last beyond January. In addition, by God Grace we are expecting posting of permanent parish priest within this year 2025. So the borehole will in no small measure reduce our suffering in search for drinking water and for other uses.

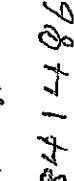

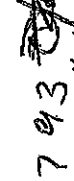

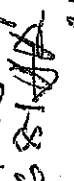

Thanks for your kind consideration.

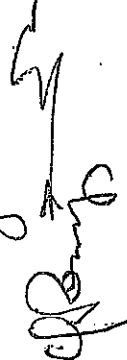

Yours faithfully, 

Dr. Edwin Idenyi
(Vice-Chairman Parish Council).

SAMUEL OMOGO FOUNDATION (SOF)
FOR BOREHOLES IN EBONYI STATE COMMUNITIES

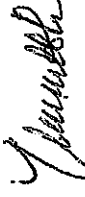

SIR,

APPLICATION FOR THE PROVISION OF WATER BOREHOLE

We, the entire members of the above mentioned village humbly apply for the provision of water borehole in our village. This is because the village has no source of drinking water for the past five decades and this has resulted to the emergence of different water borne diseases in the area.

However, we solicit for a safe source of water to eradicate the deadly menace in our village. Thanks.

Yours Sincerely,

OBO JOHN IZEKWE

NDIAGU OGBA VILLAGE

ADABURU EBENYI

UMUOGUDU OSHIA NGBO.

Genesis Primary School
Ndeggu Obu Okposhi Ehekú Ngbo
Ngbo Central Development Centre
Ohaukwu L.G.A
Ebonyi State, Nigeria.
16th January, 2025.

The Manager,
Samuel Omogo Foundation
C/O Rev. Fr. Dr Peter Omogo.

Father,

REQUEST FOR BOREHOLE DRILLING IN OUR SCHOOL

The P.T.A of Genesis Primary School Ndeggu Obu, Ngbo are requesting you to drill a bore hole in our school. Genesis primary school which was established thirty years ago has no source of water for drinking. The school is suffering from water problem. The source of water for the school are Iyiogege near Abogodo and Ebonyi River in Okpochiri, Ezillo, Ishielu L.G.A. The Iyiogege stream has dried up in December, 2024 due to cows reared which drank much water.

If the borehole is drilled in Genesis Primary School, Ndeggu Obu, It will go a long way in combating water problem for our school pupils, the teachers and the people living around the school.

Father, may you help us and grant our request.

Yours faithfully

Mr. Okpaga Simon Akpu

Sir,

**APPLICATION OF NEED SASSESSMENT BOREHOLE AT
IGWEBIKE VILLAGE UMUOGUDU AKPU NGBO**

We hereby apply for Borehole at Igwebike Village Umuogudu Akpu Ngbo. We are totally shot of good water supply. We also travel very distance before we can fetch water and it takes 15 to 30 minutes before it reach your town.

Our people suffer many diseases due to lack of good water supply. The stream we fetch water during raining season is being contaminated by community refuge and sewage, and those that live near the stream dedicate near the stream which causes the stream unable to drink.

We will be very grateful if our request is duelly granted.

Ogwe-Iyi Village Abogodo
Okposhi Nkwolu Ngbo
Ohaukwu L.G.A
Ebonyi State.
15th January, 2025.

The Managing Director,
Samuel Omogo Foundation.

Sir,

APPLICATION FOR A REQUEST FOR BOREHOLE IN OUR VILLAGE.

We the entire village sincerely appreciate the good Godly work of Rev. Fr. Dr. Peter Omogo and his enviable foundation for providing abundant life for the entire people of Ebonyi State Communities. This is because water is life. People of Ogwe-Iyi village of Abogodo in Okposhi Nkwolu Ngbo hereby wish to apply for a borehole in their village from the foundation. This will greatly alleviate the people from suffering several diseases caused by bad water they drink daily.

It is unbearable to state that only source of water in our village is a pound and moldy stagnant water that is used by both wild animals and human beings. The people have been suffering from Guinea worms, stomach upsets and other water borne diseases.

We are seriously begging that this good work and services of Rev. Fr. Dr. Peter Omogo and his foundations will reach us as it reached others, so that our suffering will stop and his good name will continue propagating more.

Our prayer is that Almighty God will protect and guide him in all his endeavors and increase his foundation larger so that the benefit will reach all and sundry.

May this our humble request be favourable granted.
Thank you and God bless.

Sir,

REQUEST FOR A BOREHOLE

RE: NDIAGU-OBU UFFIOBOTO VILLAGE

We the entire people of Ndiagu-Obu Uffiboto Village in Amike Community Izhia hereby cry for help. The problem of water in the village has been a re-curent and heartfelt problem to the people both young and old. The people have cried to several quarters for a help but none did come, those that came was located wrongly, due to political interest and today it is not working at all.

The people have to fetch water from pounds, streams that are far. Attached here is the photograph of the type of water the villagers fetch. With hope that our request will be treated favourably.

Thanks.

Dear Fr.,

AN APPLICATION FOR THE SUPPLY OF BOREHOLE

We the above mentioned community appreciate your effort in delivering people from their different problem especially from scarcity of water. So, we like the people of Macedonia in Acts of the Apostle 16:19, humbly wish to apply again for the supply of borehole under your good office.

We had applied for it in 2022, but we missed our opportunity due to uncertain circumstances. Therefore, we humbly appeal that you use your good office to rescue us from this ugly situation (Scarcity of water).

We strongly hope that this our application shall be duly considered.

Thanks for your anticipated co-operation.

ECHARA AMOVU IN ISHIELU COMMUNITY

EZZANGBO OHAUKWU LGA

EBONYI STATE – NIGERIA.

14th January, 2025.

Samuel Omogo Foundation (SOF)

Through,

Rev Fr. Dr. Peter Omogo,

APPEAL FOR THE INSTALLATION OF A PIPE BOREHOLE WATER AT OUR VILLAGE ECHARA IN AMOVU VILLAGE IN ISHIELU COMMUNITY EZZANGBO, OHAUKWU LOCAL GOVERNMENT AREA.

The Village Head, the Chiefs, the Community Leader, the Village Security and the entire villagers at Echara Amovu in Ishielu Community Ezzangbo Ohaukwu Local Government Area wish to appeal for the installation of pipe borehole water at our village. This is due to the condition we are having when it comes to having good water source. We have seen that installation of pipe borehole water will make us achieve our dream of having good source of water in our village.

As a result of bad ponds, streams, unprotected and infected well water;

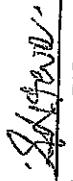

- Unable to enjoy good health for our people as we are infected with typhoid fever, cholera, guinea worm diseases, skin infections etc.
- Unsatisfactory water as one can run a risk of being infected after struggling to fetch.
- This ponds and streams gets dry from February as its affected by dry season. We go as far as 30-40 minutes' walk just to fetch the so called ponds water, so painful.

Hence the request for a borehole installation at our village will help the villagers and others within the village to drink clean and uninfected water. We hereby

appeal your foundation (Samuel Omogo Foundation) to help us by giving us a favourable consideration. God bless (SOF) Amen.

The Founder and CEO,
Samuel Omogo Foundation.

Dear Sir,

Application for Provision of Borehole for Olu-Uwa Village Amike Izhia.

The above subject matter refers.

We sincerely and humbly apply for provision of borehole for our village. Our Village only source of water supply is Olu-Uwa stream, which is dangerous to health.

Worse still, it is only available during rainy season.

Consumption of this water is the major cause of Cholera outbreak in our village. The provision of the borehole will end perennial water scarcity in the village, offer access to clean water and forestall water borne diseases in our village.

We pray God to lavishly bless and reward your foundation for your philanthropy and humanitarian services to the masses.

Thanks for your gracious and kind approval in anticipation.

Yours faithfully,

Signed

Samuel Omogo Foundation,
c/o Rev. Fr. Peter Okwoeze Omogo (Jp),
Ikponkpuma Abarigwe
Umuogudu Oshia Ngbo,
Ebonyi State Branch.

Dear Father,

APPLICATION FOR DRILLING OF A BOREHOLE.

The above subject matter refers as we, the people of Ndiagu Ngele Okpe write to apply for one borehole from your foundation to reduce the sufferings and burden of our people because of the scarcity of good sources of water supply in the recent years.

Our village has a population of over 300 persons with 60 households suffered seriously because of lack of good water supply as many students were bitten by snakes resulting in their deaths and outbreak of cholera that has claimed so many lives; with guinea worm have combined to disturb the village people in some years now.

The only available source of water supply was the Ogwunkpagba dam which is not even safe for drinking as animal dungs usually make it to be filthy and bad for drinking and domestic uses like cooking etc.

Our wards and students travel a very long distance of about six kilometers before they can access water for drinking and for other domestic uses and these had been hampering the progress of our students in their Exams to mention just a few.

We have strongly promised to support the foundation in prayers and otherwise for the patronage she has been rendering to the poor and needy and wish her to extend the hand of benevolence to our people to enable us enjoy good water supply like other peoples in our locality.

Thanks for your anticipated co-operations.

1. Name of LGA: OHAYU/KALU Date: 14-01-2025
2. Name of village/community: NDIACHU ONAKE Phone No: 07038140952
3. Proposed Location of the borehole: AMARILU
4. Name/occupation/phone no. of proposed borehole assistant manager: JAMES OMU
07061188180

5. What is the estimated population size/number of households of your community? 65000
6. What is the main source of water supply in your community?
 - (i) For drinking well, pond, stream
 - (ii) For domestic use hand dug well, pond, stream
7. How much quantity of water is required per household per day in your community? 1000 litres
8. What is the name of the source of water supply? Okpuru
9. How does majority of the community members get to the source of water supply? vehicle, motorcycle, bicycle, foot All of the above
10. How far/how long does it take to reach the source of water supply from your community? 50kms

11. How is the quality of the water? Excellent, good, acceptable, unacceptable: Unacceptable
12. Who are those that normally fetch water for household use in your community? Women & children
13. How long does it take to reach someone's turn at the source of water? 10 hours
14. How long is the source of the water supply available in a year? Only rainy season
15. What are the water-borne diseases suffered by members of your community? Gonorrhea, cholera, typhoid, malaria, etc.
16. What are the possible contaminants of the water sources in your community? Sewage, faeces from infected persons, urine, etc.
17. What challenges/risks do people face at the source of water supply? Distance, lack of security, police cases from the above problems, at worst death.
18. What are other negative effects of water scarcity in your community? Time wastage, health problems, suffering, skin diseases, high rate of death.
19. How can the provision of borehole benefit your community? Reduction of water scarcity, creation of unity among the people, reduction of water-borne diseases, proper management of the borehole site.
20. What plans does your community have to maintain the borehole? Provision of a borehole committee, proper management of the borehole site.

Sir,

**AN APPEAL FOR THE INSTALLATION OF PIPE BOREHOLE WATER AT
NDIAGU ONWE VILLAGE AMAEKU NGBO**

We, the entire people of the above named village humbly apply and appeal for an installation of a pipe borehole water in the village. This will help us seriously to address our donkey years scarcity of water that had brought so many challenges like diseases, hatredness disunity, death and other risks among the people especially during the dry season that we suffer the effect of the lack of source of water supply most.

We applied in the year 2021 but we were unfortunate. We pray to always take proper care and maintenance of the pipe borehole water immediately it is installed.

To God be the glory, for your candid consideration of this our humble request and approval.

Sir,

REQUEST FOR BOREHOLE WATER

We the residents of Nwonumara in Onu Ebonyi community wish to request for borehole water drilling in our area. This is due to the long-aged stress the community pass through in accessing portable water for domestic use, getting our children exposed to diseases.

We will be very grateful if our request is granted

Thank you and God bless you in Jesus Name Amen.

Sir,

APPLICATION FOR THE CONSTRUCTION OF WATER WELL (BORE HOLE)

We the aforementioned, villagers wish to use this medium to request from your foundation for the construction of water well (Borehole) in our village.

Sir, the provision of this borehole will assist the villagers in no small measure as the current water diseases attacking our villagers will be a thing of the past. In the same vein, the constant and consistance fighting for water at Ogbokovu spring will also put to a stop.

Finally, the good news of your foundation has been heard and seen in different please and hence we want to share from the good news. Attached to this letter are four copies of photograph and the filled form.

Ngbo,

16th January 2025.

The Director,
Samuel Omogo Foundation (SOF).
C/O Rev. Fr. Dr. Peter Omogo.

Padre,

APPLICATION FOR DRILLING A BOREHOLE

With due respect and absolute humility to you Father, we acknowledge your numerous helps, philanthropic gestures towards mankind in their different need particularly borehole drilling, mobility, medical treatment, and financial support and so much more.

In view of these your philanthropic gestures, we the people of Oboko Village pray that you extend this gesture to us by drilling a borehole for us because we have suffered a lot due to lack of good drinking water and inadequate supply of water as the attached pictures will show. The stream we fetch water during raining season is being contaminated by community refuge and sewage, and those that live near the stream defecate near the stream which causes the stream unable to drink.

We are more than 600 (six hundred) persons in the village and use to suffer from many water borne diseases. We therefore solicit that you extend your unalloyed help to us.

May the Almighty God bless you as you consider and grant our humble request. Thanks a bunch in anticipation.

Latora village
Ogbanna Ulepa Ntezi
Ishielu Local Government
Area.

18th January, 2024.

The Borehole Manager,
Samuel Omogo Foundation (SOF)
Umugudu Oshia Ngbo Ohaukwu LGA
Ebonyi State.

Sir,

APPLICATION FOR BOREHOLE

We the members of Latora Village of Ogbanna Ulepa Ntezi with estimated One Thousand Seven Hundred (1, 700) members wish to express our gratitude to Samuel Omogo Foundation for standing out to help the people especially in the area of providing quality water to the people.

The people of Latora Village have been in need of water as the only available water to the village is the pond that dried out after the rain. This has caused a great problem to all our homes as the school children found it difficult to attend school on time as they spent time finding water for usage. We encounter many challenges like snake bites, attack by individuals etc., at the cause of searching for water.

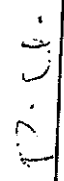

Sir we promise to take adequate care of the borehole if our application is granted. The photograph of the source of our only available water is here attached.

14th January, 2025

The Director,
Samuel Omogo Foundation,
Ebonyi State, Nigeria.
Dear Sir,

REQUEST FOR DRILLING OF WATER BOREHOLE IN MY VILLAGE

I most humbly apply for borehole in my village this is necessitation by the hardship my village in currently facing in search of water. The village is about Twenty-Five House of about Five Hundred peoples.

Some children in my village don't go to school again because of search for water. Many have divided the school days in order to choosing the days to go to school because of scarcity of water.

The stream around our village does not last in the dry season, thereby making it very difficult for the villager to strive economically. We have two numbers of ponds but do not last within the last quarter of the year. The village which is dominantly famers finds it very difficult to ^{cultivate} cultivate vegetable because of lack of water. The seedlings and plants planted during rainy season always get dead during dry season because there is no water for watering the plants and vegetables. Life is highly difficult for us in search of water

Thanks for your usual kind consideration, Sir.

Sir,

NEED FOR BOREHOLES IN OUR VILLAGE EBONYI

Sequel to our notification of your hospitality in sinking Boreholes across Ebonyi State communities, we humbly indite to be included in the project beneficiaries.

We are a village with the total number of about 250 households with severe difficulties in getting good water for drinking and domestic chores which has led to many disease outbreaks in our village and subsequently death.

We strived to meet up with the benefitting requirements as enshrined on the advert page.

We shall be very glad if this application is accorded favourable attention.

Yours Sincerely,

Dear Father,

APPLICATION FOR BOREHOLE

We humbly wish to apply for the drilling of borehole in our village Ndiaguose.

For the past decade we hardly have good source of drinking water. As a result of these people started suffering for scarcity of water. Meanwhile, in many occasions some of them felt victim of dislocation, broken of bones, water bone disease like; guinea worms, cholera, etc.

Therefore, with these condition mentioned above, we enerstly appeal for your rescue to save our peoples from series of victimization of snake attacks, water bone disease, breaking of pot, fighting and quarrelling for who will fetch first.

Thanks and God bless

Sir,

APPLICATION OF INSTALLATION OF PIPE BOREHOLE OF WATER

We are humbly apply for the installation of borehole in our village Ndiazulo Egu-Efi, Umuogudu Oshia Ngbo, for we have be passing a lot of problems for the scarcity of water in this village such as water borne disease like Cholera, dysentery, typhoid fever, diarrhea, hepatitis. A coil infection which have been leading to many death of our villagers. This water issue have be leading to fight rape, rubbering and many liking cases that have be falling our wives and children.

Therefore, we have only contaminated source of water which is only stream that last for only five months within a year, which are contaminated through dispose of human waste, animal waste, chemicals and pesticides, that make unacceptable for drinking purposes and this water source is not every close we use feet about 30 killometers to reach there for to fetch water in which it takes about four hours to reach another person's turn to fetch the water.

Moreover, we will be grateful if you can consider our application, we know the extent you have be helping people, from the time you leaved with your brother at Ndulo Ngbo, you normally fetch water and keep in your brother's shop for people to drink, which most of us due benefited while coming back from school in those days.

We thank God who brought you out to help people out of their problems and to understand the basic needs of this life which water is one of them, you have be doing it for others and our own will not be exceptional.

Thanks for your consideration.

The Director
Samuel Omogo Foundation
In Honour of Rev. Fr. Dr. Peter
Omogo
Ikpo Mkpuma Abarigwe Ngbo
Sir,

APPLICATION FOR BOREHOLE

I am writing to respectfully for your assistance in supporting our village development project in Borehole.

Our village is in dire need of infrastructure development, particularly in the area of water supply.

To address this issues we people propose to dig a borehole in our village

However, we lack the necessary resources to undertake this project. That is why we kindly request for your help. Your support will go a long way in making this project reality and would not only improve the lines of the villagers, but also demonstrate your commitment to our social life sans also to our village development.

We believe that this project would have a significant impact on our village in providing us with a reliable source of clean water, improving our agriculture, and enhancing our over all quality of life.

Thank you for considering our request.

Ndiagu Ominyi
Amoffia Ngbo
13th January, 2025.

Samuel Omogo Foundation
Rev. Fr. Dr. Okwoeze Omogo
Parish Priest Catholic Church
America.

Rev. Fr. Dr.

APPLICATION FOR BOREHOLE

We the members of Wesley Methodist Church Nigeria Ndiagu Ominyi in Amoffia Ngbo humbly apply for the water-borehole. This is as a result of scarcity of water in the village which causes the Rev. to fetch water by him self as we command your good effort in making life general, may the good Lord continue to reward you more abundantly.

Lack of water has been one of the problems facing the village since ^{Creation} widows, old women and children track for about five kilometers before they could reach the stream, drinking of water from the stream has also exposed many to contract of cholera, Diarrhah and other water-born diseases. Treatment of the diseases has also brought us economic hardship.

The pressure of water borehole in the church will drastically reduce both the stress and sickness-caused by bad water supply among the villages; also it will be a means of spreading the good message of our Lord Jesus Christ. Will also give the villages access of drinkable water, the far location of borehole from the church and many of the villages will also reduce.

We pledge to take good care of the borehole as a church if it is given to us.
we will be grateful if our application is considered.

Yours in his vine yard.

Signed:

Mr. Sunday Udu

APPLICATION FOR DRILLING A BOREHOLE

With due respect and absolute humility to you Father, we acknowledge your philanthropic gestures towards mankind in their various needs, particularly borehole drilling, mobility, medical treatment, financial support and so on and so forth.

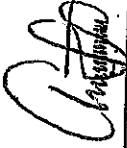

In view of these your philanthropic gestures, we the people of Aguigba Village pray that you extend this gesture to us by drilling a borehole for us because we have suffered a lot due to lack of good drinking water and inadequate supply of water as the attached pictures will show. We are more than 500 (five hundred) persons in the village and use to suffer from many water borne diseases. We therefore solicit that you extend your unalloyed help to us.

May the Almighty God bless you as you consider and grant our humble request. Thanks a bunch in anticipation.

The Priest in-charge,

APPLICATION FOR DRILLING OF BOREHOLE

The people of above named address, hereby request for the drilling and installation of manual borehole at their village square. This is to enable them to be relieved from the difficulties and challenges in getting good water for domestic uses.

The village is located far from the town and lacks all social amenities needed to sustain human life. They have suffered from different disease/illness as a result of using unclean water.

We do hereby wish to benefit from your benevolent services as government has no plans to come to our aids.

The photographs are hereby attached to this letter.

Thanks for granting our request in anticipation.

Sir,

APPLICATION FOR DRILLING OF WATER BOREHOLE.

We the minister and the members of deliverance of God church. (A.K.A ARENA OF FAVOUR) humbly wish to request for the drilling and construction of water borehole in our church.

Sir this request is made due to lack of water supply in our church/communities at large, it affecting most of our programmers and the house Activities of the ministers and his family.

Please sir, all our efforts to provide a steady water supply in our church prove so abortive.

It is our prayer that God will use your good office to make life easy for us by providing a permanent water supply in our church.

Thanks for your anticipated response.

Yours faithfully.

Ebonyi State.

Sir,

APPLICATION FOR SINKING OF BOREHOLE

We, the entire good people of Ndiagu Olodo Village in Obulegu Uwule Autonomous Community, Nkalagu, humbly wish to apply for the installation of borehole in our village. Reason, we have been suffering scarcity of water for many years in our village and community at large. The only sources of water supply are:

1. Stream
2. Pond Respectively.

These two sources of water supply have generated a lot of diseases to us such as cholera, cough and Guinea Worm respectively. The two sources of water supply is available in a year from August to February (4 months).

We are making this appeal because of the ordeals we are going through due to scarcity of water. We find it difficult to access water both for drinking and for use in our domestic activities. Our wives and children suffer greatly before getting water during dry season.

All our efforts to have borehole from the past and present Government proved abortive.

Therefore, we humbly appeal that you use your good office to rescues us from the ugly situation, please sir, help us to overcome this problem.

We strongly hope that this our application shall duly considered.
Thanks for your anticipated co-operation and Assistance.

Yours faithfully,

Dear Sir,

APPLICATION FOR BOREHOLE

We the above village with the population size of "One Thousand Two Hundred and Ten (1,210)" and over Three Hundred (over 300) households, humbly apply for borehole in our village.

The village has no good drinking water as you can see in the picture attached with the form. The only source of drinking water we have is very bad (dirty pond) the water has been causing health hazards to the people.

More so, the dirty pond water cannot last during the dry season which make our people to travel to a long distance in search of drinking water

Please, our compassionate and caring (Rev. Fr.) come to our help as we promise to maintain and manage the borehole very well if our request is granted.

Thanks in anticipation of your favourable response

The Borehole Manager,
Samuel Omogo Foundation,
Ikpomkpuma,
Umuogudu Oshia-Ngbo,

Dear Sir

APPLICATION FOR BOREHOLE

We the good people of the above address humbly write to request for Borehole from your noble foundation (SOF).

The people of Ama-ogelewu Izhia, azu okpuru axis have been in need of water seriously as the only available water source in the area is nothing to be written home about. This has resulted in old women especially widows and our School children covering a very long distance to source water as the one within always dries up after the rainy season.

Sir, we sincerely pray and hope in your kind assistance and be assured of good and adequate care of the Borehole as we will be eternally grateful if the application is given a favourable consideration.

Sir, Kindly find attached the pictures for your perusal.

Thanks and God bless you sir.

Motto: Sapientia, integritas et Patientia

Your Ref:

Our Ref:

Date: 13-01-2022

The Founder,
Samuel Omogo Foundation,
Ngbo,
Chaukwu LGA.

Dear Fr,

Request for a Borehole in St Michael's College, Oshiri

I humbly write to your foundation in request for the drilling of a borehole in our school. For years, our school had witnessed great challenges in the area of water supply. This teething problem has greatly affected the growth of the community especially in area of health, agriculture and other domestic use.

Thus, I humbly plead that your foundation comes to our rescue by drilling a borehole in our institution in order ameliorate this current parlous situation. I also use this medium to applaud your foundation for their great service to humanity. Thanks in anticipation of a positive response from you.

Yours faithfully,

Rev. Fr. Jude Otunwa

Principal.
